WELCOME

Measuring What Matters In Our Community

After going through such a monumental year and facing challenges we never imagined were possible, beginning the Community Health Improvement Plan document without acknowledging the impact of COVID-19 would be erroneous. The Community Health Improvement Plan (CHIP) helps us incrementally measure our progress as we work to improve the health of everyone who lives, works, and plays in Garrett County. COVID-19 changed our home, but made our community even stronger.

No one expected the loss of life, the lockdown, or the emotional distress that gripped us as COVID-19 began to spread. Isolation and fear profoundly affected both our physical and mental health. In the same breath, no one anticipated the good that would come from something so terrible, like the way people leaned on one another, found a deeper sense of purpose, and banded together to help those most in need. Through these unprecedented times, we really have come to realize the things that really matter most to us.

As we begin digging into the first iteration of the second volume of the responsive Garrett County Community Health Improvement Plan, I invite you to take a deep breath with me. To take a moment and grieve all the things we lost, and stand together as we look forward with renewed strength to rebuilding and maintaining our home, Garrett County, that's built with love.

Shelley Argabrite, M.A. & Cassie (Beloved Pandemic Puppy)

Strategic Health Planner & Director of the Population Health, Innovation & Informatics Unit at the Garrett County Health Department

HOW IT WORKS

A Hyper Local Data-Driven Approach to Population Health

While Garrett County, Maryland has a long established record of excellence in collaboration, the innovative and transformational community health improvement planning processes found at mygarrettcounty.com, and summarized in this document, demonstrates our commitment toward measuring the improvements in local health outcomes for stakeholders in our community.

This innovative process originated out of the need to increase representation, improve stakeholder engagement, and create opportunities for equity to flourish. This journey began through analysis of the Garrett County 2016 Community Health Assessment, which identified four broad focus areas for our community, based on the data collected: behavioral health (including substance related disorders and mental health), chronic diseases (prioritizing modifiable risk factors, such as physical activity, nutrition, and tobacco use), access to care and community linkages, and maternal, child, and adolescent health (later revised to incorporate comprehensive family health, regardless of familial structure). While these focus areas initially guided our framework for mygarrettcounty.com, many additional community-driven insights, especially within the domain of the social determinants of health (also referred to as social risk factors), emerged through open and transparent digital discussions, and have gained popularity as matters of importance that are actively addressed with measurable strategies in this version of the Community Health Improvement Plan.

This transformational process is the first-of-its-kind to be driven by hyper local data, collected and reported within and by our community, that is timely, actionable, specialized, attributable, and collective to ensure validity and understand interoperational connectivity. The process is now recognized as a model practice by NACCHO, but more importantly offers a beacon of hope for our community's most vulnerable residents as it seeks to engage nontraditional, multisectoral partners at an unprecedented scale and works toward establishing baselines for the most vital programs, initiatives, and systems changes that ensure healthy, thriving communities.

This innovative approach utilizing time-framed targets is the most comprehensive pivot toward data-driven decision making that our community has ever employed, and offers incalculable opportunities for collaborative strategies that seek to not only improve, but transform health outcomes in Garrett County, Maryland.

INNOVATION VISION

A Responsive & Real-Time Approach To Population Health

The Garrett County Planning Tool, found at mygarrettcountry.com, was created with the intention to guide our community as we built a local, data-informed vision from our current needs by meaningfully and transparently engaging all residents.

This vision becomes actionable through the planning tool framework providing the platform for the creation of a comprehensive and responsive Community Health Improvement Plan. Demonstrating high performance through accountability and credibility is an especially important element for health departments initially seeking or maintaining public health accreditation and is essential to sustaining a robust public health system that is responsive to the needs of all residents.

This framework guides stakeholders through the process of creating a measurement framework to ensure that the strategies they implement to improve health in our community have metrics that specifically align with desirable population health outcomes identified as strategic priorities through our Community Health Assessment. The ultimate goal being that the specific strategies, measured as hyper local data, become the primary method of program attribution and are measured via time framed targets.

"The Garrett County Planning Tool provides a place for our constituents to share what's important to them and be a part of the decisions that affect them and their families as it relates to health and well-being."

Chairman Edwards, Garrett County Board of Commissioners

Meaningful, transparent measurements establish unprecedented levels of accountability and commitment by community agencies and stakeholders to work collectively toward eliminating health disparities and develop equity, while propelling Garrett County toward transforming into the healthiest community to live, work, and play in the state of Maryland.

HOW TO USE THIS PLAN

5 Years Of Integrated, Accessible, & Open Planning

This Community Health Improvement Plan (CHIP) is unlike any other our community has ever had access to in the past. This plan is living, and constantly being revised, updated, and worked on at mygarrettcountry.com, where anyone who lives, works, or plays in Garrett County has an opportunity to participate in the planning and implementation processes. Due to the dynamic nature of this CHIP, snapshots are taken frequently for comparison of performance measures over time, and to correlate our collective efforts in working toward improved health outcomes for Garrett County.

Every strategy that the CHIP measures lives in a group on mygarrettcountry.com, where transparent, collaborative planning occurs. This innovative process is open 24/7 to make it easy for people to participate at their convenience and improves community engagement. After all, community improvement initiatives are most successful when we're able to work together. So merge your passions with our purpose, and join groups today to make Garrett County a healthier place to live, work, and play tomorrow!

You may notice in future iterations of this plan that data points may change and strategies may be improved as we work to become more responsive to the community. While this printed plan is a convenient carry along, we encourage everyone to utilize the digital edition at mygarrettcountry.com to always have access to the most up-to-date information, and have plentiful opportunities to participate in the implementation and refinement of these strategies, or propose new ones as health priorities change and evolve over time. We'll see you on mygarrettcountry.com, and look forward to improved health outcomes!

Photo: The Garrett County Health Planning Council group that launched the 2016 Garrett County Community Health Assessment and participated in the planning meeting for the Garrett County Planning Tool.

A dog is lying on a mossy log in a stream. The water is flowing over the log, and the background is a lush green forest. The dog is looking towards the camera.

Health Improvement Strategy

Administrative Care Coordination

<https://mygarrettcountry.com/groups/administrative-care-coordination/>

Goal:

To assist Medicaid/Health Choice eligible beneficiaries to access and appropriately use their Medicaid benefits.

Strategy Description:

The following strategies will be implemented to achieve the identified goal: Receipt of and prioritization of referrals and activities will be provided to: Pregnant & postpartum woman Newborns and children under two Children with special health care needs Children 2-21 years of age Adults with special needs Family Planning beneficiaries. All recipients will have a minimum of three contacts prior to proceeding to unable to locate status (phone calls, mailings, and home visits as necessary). Adequate attempts of reaching the client will be completed within the 30 day timeframe. The initial attempt to contact a pregnant woman will be within (7) business days of the referral. An attempt to contact a beneficiary will be made within (15) business days. An additional strategy will include coordinators conducting general information sessions for Medicaid recipients by increasing awareness of Medicaid programs. Potential medical assistance eligible clients will be encouraged to apply for programs. Awareness to the public may include phone calls, bulletin board postings, mailings, letters, newspaper articles, etc. At initial contact with Medicaid recipient, information will be provided regarding the HealthChoice Helpline and complaint resolution services. There will always be a Care Coordinator available during working hours to assist with care coordination. The information provided to a beneficiary will be limited to that which will enable the beneficiary to access covered Medicaid services in an appropriate, timely, and cost-effective manner. Coordinators will be knowledgeable about Managed Care Complaint and Grievance and Appeals process. Prenatal risk assessments are received from four prenatal clinics, strategies to increase the number of assessments include: provider education by visiting the prenatal clinics (at least quarterly), contacting them by phone (weekly).

Strategies and Objectives:

Strategy #1: Increase the number of ACCU referrals received

Objective #1: Outreach to OB/GYN offices to promote accurate completion of Maryland Prenatal Assessments.

Health Improvement Strategy

Adult Evaluation and Review Services: AERS

<https://mygarrettcountry.com/groups/h2h/adult-evaluation-and-review-services-aers/>

Goal:

Our goal is to connect more adults and disabled persons with resources that will allow these persons to remain as independent as possible in the least restrictive environment, and in turn reduce the number of nursing home and also hospital/emergency room admissions. We also assist individuals who are in need of the PASRR process for nursing home admission. Adult Evaluation and Review Services is a program that links individuals (mostly non-Medicaid) to resources in the community that they probably were not aware were available or that they qualified for. We offer nurse and social work oversight when the evaluations are completed (most visits are done in the client's home). Some of the many things we assist people/connect them with are: Alzheimer's Resources, assisted living, cancer programs, dental and denture referrals, chore assistance, senior care, food banks, food stamps, home-delivered meals, vision assistance from the Lion's Clubs, medbank, medical equipment, mental health, national family caregiver program, nursing home placement, personal emergency response systems, private duty caregiving agencies, short term medication program, smoking cessation, transportation, and veterans administration. The goal is to allow clients to stay in their homes longer and enjoy the best health using the resources available to them.

Strategy Description:

The AERS program is implemented through the local health departments. They conduct long term care evaluations of those persons with health, psychosocial, and functional impairments who are at risk of institutionalization, to determine the most appropriate services to meet their health needs in the least restrictive setting. The staff provides a comprehensive health and social assessment of the over age eighteen/disabled population (target population being 60 and over) in order to determine which community and private resources will meet their individual needs. We also assist individuals with the PASRR process when seeking nursing home placement and assist nursing facilities with interpretation of the PASRR rules and regulations/processes. Strengthen relationships with community referral sources to increase participation from the community.

Strategies and Objectives:

Strategy #1: Ensure clients are being seen within the first 30 days of a referral

Objective #1: Schedule and/or reschedule 10% more clients within 30 days of the initial referral by September 30, 2021

Objective Time-Frame Target Measure: # of C.F.C./C.O.W. Nurse Mon. referrals from the LTSS System/obtained from LTSS - My List/Nurse Mon.past due & due in 30 days

Research:

By connecting individuals with resources in the community, the number of nursing facility and hospital/emergency room admissions in the community has decreased or delayed. This benefits both the individuals who are more comfortable and recover more quickly in the least restrictive environment, and the community. It also benefits the local hospital by assisting people with services that then decrease the need for emergency room visits and hospital admissions/re admissions. The hospital now has staff whose specific goal is to decrease repeat visits to the emergency room, and they often send referrals to AERS to help these patients find resources to assist them (many times these referrals from from the hospital to MAP, and from MAP to AERS).

Research:

What is behavioral therapy? Behavioral therapy is an umbrella term for types of therapy that treat mental health disorders as well as substance abuse disorder. This form of therapy seeks to identify and help change potentially self-destructive or unhealthy behaviors. It functions on the idea that all behaviors are learned and that unhealthy behaviors can be changed. The focus of treatment is often on current problems and how to change them. Who can benefit from behavioral therapy? Behavioral therapy can benefit people with a wide range of disorders. People most commonly seek behavioral therapy to treat: depression anxiety panic disorders anger issues It can also help treat conditions and disorders such as: eating disorders post-traumatic stress disorder (PTSD) bipolar disorder ADHD phobias, including social phobias obsessive compulsive disorder (OCD) self-harm substance abuse Is behavioral therapy effective? Behavioral therapy has successfully been used to treat a large number of conditions. It's considered to be extremely effective. How to find a behavioral therapist? Finding a therapist can feel overwhelming, but there are many resources that make it easier. When finding a provider, you can choose from: social workers faith-based counselors non-faith-based counselors psychologists psychiatrists You should make sure that the provider you choose has the necessary certifications and degrees. Some providers will focus on treating certain conditions, such as eating disorders or depression. If you don't know how to get started finding a therapist, you can ask your doctor for a recommendation. They may recommend you to a psychiatrist if they think you might benefit from medication. Psychiatrists are able to write prescriptions for medication. Most insurance plans will cover therapy. Some providers offer scholarships or sliding-scale payment for low income individuals. A therapist will ask you many personal questions about yourself. You will know you have found the right therapist if you feel comfortable talking to them. You may have to meet with several therapists before you find the right one. More information on this topic can be found at: <https://www.healthline.com>

Health Improvement Strategy

Child and Adolescent Wellness Workgroup

<https://mygarrettcountry.com/groups/increase-adolescent-well-child-checks/>

Health Care

Goal:

Create a collaborative group interested in improving aspects of child and adolescent well-being that's driven by data. This workgroup reports directly to the Health Planning Council and will serve as the overarching parent group as other needs are identified in the community.

Strategy Description:

1) Increase the number of well child checks among adolescents from various medical practices 2) Track HPV vaccine administration from various medical practices.

Strategies and Objectives:

Strategy #1: Help medical practices report well child check data into this action group

Objective #1: Make contact with each medical practice that has already committed to reporting data on a monthly basis for consistency in reporting every month.

Objective Time-Frame Target Measure: Well visits for ages 12-17 years for GMG

Objective Time-Frame Target Goal:

Objective Time-Frame Target Date: 2021-09-15

Health Improvement Strategy

Community First Choice/Community Options Waiver

<https://mygarrettcounty.com/groups/community-first-choicecommunity-options-waiver/>

Goal:

To assist individuals who qualify for a Nursing Facility Level of Care to be able to stay in their own homes or in the least restrictive environment with assistance, in the most timely manner possible. Our goal is to complete 70% of assessments by the due date assigned to these assessments by the state. This in turn reduces the number of nursing facility and hospital/emergency room admissions.

Strategy Description:

Provide an evaluation to certify medically compromised individuals who would normally require nursing home care, to be able to stay in their homes with assistance. We will do this in the most timely manner possible, by attempting to complete at least 70% of assessments by the due date. Based on the nursing evaluation, client must obtain a nursing facility level of care. Financial criteria is also required, meaning client must have Medicaid. Administrative Support will be utilized to call medical offices to request medical records, thus freeing up nurses time to complete the assessments in a timely manner. AERS is also charged with nurse monitoring the clients in this program to make sure their needs are being met.

Strategies and Objectives:

Strategy #1: Staff conducts evaluations in order to assist clients in obtaining a nursing facility level of care.

Objective #1: 70% of assessments will be completed by the due date, which is 15 working days from the date that the alert/referral was sent.

Objective Time-Frame Target Measure: Percentage of Waiver/CFC Assessments completed by requested due date (Referral Log Clinic Analysis Report in PatTrac)

Objective Time-Frame Target Goal: 70

Objective Time-Frame Target Date: 2021-07-01

Estimated Cost of Implementation:

Moderate

Potential Community Benefit:

High

Health Equity:

Low income patients are getting better access to care, reducing the need for acute care, such as emergency room visits. Patient's are more regularly getting to physician appointments, getting needed equipment and testing, and better access to mental health services. All at a lower cost than inpatient hospital stays or nursing home stays.

Research:

This program is effective because there are now over 150 clients who qualified for a Nursing Facility Level of Care, meaning medically they could qualify for nursing home care. Instead of having to move into a nursing home, these people are able to stay in their homes or the least restrictive environment, with assistance from a Medicaid paid caregiver, oversight by nurses from the caregiver agencies, and nurse monitoring by the health department nurses. This program also reduces hospitalizations/emergency room visits due to the client receiving the additional support in their home or in the least restrictive environment. The data reported is collected from the following sources: Objective 1:1, % of Assessments completed by the due date, is from a report in PatTrac , located under Clinic Reports, and titled Referral Log Clinic Analysis. Objective 1:2, # of completed assessments is obtained from a list maintained by the office administrator and reviewed with nursing staff Objective 2:1, # of patients receiving services in the current month - obtained from a report in PatTrac titled AERS Caseload by Program and Service Area. Objective 2:2, # of Nurse Monitoring Visits completed in a month - Obtained from the nurses, self-reporting Objective 2:3, # of Nurse Monitoring Units completed and billed in a month - Obtained from a report in LTSS, under Activity & Billing Reports, entitled SPA-NM Activity Report. Units are calculated based on how many minutes each activity required.

Health Improvement Strategy

Early Care Immunizations

<https://mygarrettcountry.com/groups/early-care-immunizations/>

Goal:

Increase immunization rates and reduce preventable infectious diseases.

Strategy Description:

The Community Preventive Services Task Force recommends home visits to increase childhood immunization rates. The recommendation is based on strong evidence of home visitation providing effectiveness in increasing vaccination rates as a result of home visitors completing activities that include home visitors assessing clients' vaccination status, discussing the importance of recommended vaccinations, and referring to primary care providers (The Community Guide, 2016). In addition to the above activities, Healthy Families Garrett County provides assistance to families by arranging or providing transportation to medical appointments for immunizations as needed. The program also provides verbal and written vaccine education to families, provides immunization tracking books to families and collaborates with providers, along with families as needed, to discuss and schedule necessary appointments. Healthy Families Garrett County collects data on the following measures to evaluate effectiveness of home visitation services in increasing immunization rates for children enrolled in program services: % of Enrolled Healthy Families children up-to-date with immunizations between 19 and 35 months % of Enrolled Healthy Families children between 12 and 23 months up-to-date with immunizations required for 6 months of age; and children 23 months up-to-date with immunizations required for 18 months of age # of families enrolled in Healthy Families provided education on immunizations (education includes information on the importance of immunizations, the American Academy of Pediatrics recommended immunization schedule, what to expect when receiving immunizations, child care after immunizations, tracking immunizations received, etc.) % of Children enrolled in Healthy Families up to date with well child visits per the American Academy of Pediatrics recommendations

Strategies and Objectives:

Strategy #1: Present vaccine information at home visits and follow-up to ensure children are being vaccinated

Objective #1: Increase vaccination rates for children by 5% for those being presented with education by ensuring follow-up by September 30, 2021

Objective Time-Frame Target Measure: 3) # of Times Healthy Families Garrett County Home Visits Focus on Immunization Education

Health Improvement Strategy

Early Care Programs System of Care

<https://mygarrettcounty.com/groups/early-care-programs-system-of-care/>

Goal:

To empower parents to give their child the best beginning in life!

Strategy Description:

How Early Care Systems of Care can empower parents during the most important stages of learning (birth to three): Answers questions about pregnancy, nutrition, and childbirth. Links families with community resources. Teaches methods to soothe a crying baby. Offers breastfeeding support. Offers childbirth and breastfeeding classes. Provides developmental screenings. Invites caregivers and children to group activities such as Pizza N Play, Parent Groups, and Stroller Walks. Provides information on infant care, nutrition, child development, health, safety, and many more topics. Helps families set goals for the future & assist families in reaching them. Supports families to achieve advanced education and job readiness goals. Offers Free Warm Line services- Friendly, call-in telephone information & support (301-334-7720 or 301-895-3111).

Strategies and Objectives:

Strategy #1: Encourage positive play time within a group setting

Objective #1: Hold at least one Parent/Child Group activity per month consistently through September 30, 2021

Objective Time-Frame Target Measure: Parent/Child Group Activities held per month

Objective Time-Frame Target Goal: 1

Objective Time-Frame Target Date: 2021-09-30

Health Improvement Strategy

Garrett County Medbank Program

<https://mygarrettcountry.com/groups/garrett-county-medbank-program/>

Goal:

Provide access to prescription medication to medically needy, eligible Garrett County residents

Strategy Description:

Referrals to the Medbank Program can be made by anyone and are made by contacting the Garrett County Health Department Medbank Program. Individuals must reside within Garrett County, have no prescription coverage through private or public insurance, and meet financial guidelines. Individuals must be willing to provide the following proofs for eligibility verification: Social Security Numbers Income Proof (including current year income tax info) for all members of household Medication(s) and Dosage(s) Denial Letters for Medicaid (if appropriate) Health Insurance Information Financial eligibility guidelines as well as medication availability are established by each Pharmaceutical Company.

Strategies and Objectives:

Strategy #1: Increase referrals for prescription medication for diabetes

Objective #1: Use GO GC to increase referrals from 4 to 9 by September 30, 2021

Objective Time-Frame Target Measure: (3) # of prescription medication for diabetes

Objective Time-Frame Target Goal: 4

Objective Time-Frame Target Date: 2021-09-30

Health Improvement Strategy

Garrett County Water

<https://mygarrettcountry.com/groups/garrett-county-water/>

Goal:

To issue Certificates of Potability to new wells as required by COMAR.

Strategy Description:

Once a new well is drilled, water testing will be completed to determine if the water meets potability standards set in COMAR. If certain parameters are not met, the appropriate action will be enforced to ensure potable drinking water.

Strategies and Objectives:

Strategy #1: Collect water samples from new wells as they are drilled.

Objective #1: Schedule water sampling of new wells once contacted by the well owner or driller and obtain at least 15 certificates of potability per month until September 30, 2021

Objective Time-Frame Target Measure: Certificates of Potability Issued

Objective Time-Frame Target Goal:

Objective Time-Frame Target Date: 2021-09-30

Health Improvement Strategy

Garrett Guide

<https://mygarrettcountry.com/groups/garrett-county-community-engagement/garrett-guide/>

Goal:

Provide current resources for both the general public and agencies/organizations to be informed of the available resources within Garrett County.

Strategy Description:

Garrett Guide is the digital Community Resource Directory with the framework found at Garrettguide.org. This innovative process connects communities to available resources on-demand, including essential services by increasing community awareness and engagement through utilization within and around Garrett Guide. Local agencies, organizations, businesses, and residents have the opportunity to provide additional detail for information already included or submit new resources for the community. Information can be entered by visiting: www.garrettguide.org

Strategies and Objectives:

Strategy #1: Maintain Garrett Guide

Objective #1: Increase number of resources accessed to a 1,000,000+ by September 30, 2021.

Objective Time-Frame Target Measure: Total Number of Resources Accessed (Lifetime/All Networks)

Health Improvement Strategy

GO! Garrett County

<https://mygarrettcountry.com/groups/go-garrett-county/>

Goal:

To reduce chronic disease and minimize common risk factors by promoting local programs and increasing referrals by implementing a well-being program that utilizes behavior change principles.

Strategy Description:

To promote and measure well-being through broad digital engagement with content curated by the community, coordinated across sectors by featuring existing resources to improve well-being.

Strategies and Objectives:

Strategy #1: Increase the number of community contributors

Objective #1: Utilize population health updates once a month to invite ten new contributors by Aug 1, 2021.

Objective Time-Frame Target Measure: Community Contributors

Objective Time-Frame Target Goal: 100

Health Improvement Strategy

Improving Healthy Birth Weights

<https://mygarrettcounty.com/groups/improving-health-birth-weights/>

Goal:

To help mothers enrolled in the program during pregnancy to deliver a baby that weighs 5.5 pounds or more.

Strategy Description:

1. Mothers enrolled prenatally in Healthy Families home visiting will receive health promotion and education during pregnancy on topics to promote a healthy pregnancy to include prevention of preterm labor, warning signs during pregnancy, nutrition, and babies born healthy. 2. Mothers enrolled prenatally in Healthy Families home visiting will be linked to a primary care provider to receive early and consistent prenatal care. 3. Mothers enrolled prenatally in Healthy Families home visiting will be linked to medical insurance during and after pregnancy. 4. Mothers enrolled prenatally in Healthy Families home visiting will be screened for emotional wellness. 5. Mothers enrolled prenatally in Healthy Families home visiting will receive Healthy Moms/Healthy Babies information. 6. Mothers enrolled prenatally in Healthy Families home visiting will receive education on good oral hygiene to prevent preterm labor. 7. Mothers enrolled prenatally in Healthy Families home visiting will be linked to nutritional resources (WIC, SNAP, food bank, ect.). 8. Mothers enrolled prenatally in Healthy Families home visiting will receive education on substance free pregnancy. 9. Early Care Program makes contact with pregnant women throughout the county and offers education on healthy pregnancy and full-term delivery.

Strategies and Objectives:

Strategy #1: Increase number of home visits performed by Healthy Families staff

Objective #1: Increase home visits by 5% and at each visit offer Healthy Mom Healthy Baby Education by September 30, 2021

Objective Time-Frame Target Measure: % of Prenatal HFGC Enrolled Mothers Receiving Healthy Moms Healthy Baby Education

Objective Time-Frame Target Goal: 95

Objective Time-Frame Target Date: 2021-09-30

Health Improvement Strategy

Learning Beyond the Classroom

<https://mygarrettcounty.com/groups/local-management-board/learning-beyond-the-classroom/>

Goal:

At each stop, the Learning Beyond the Classroom bus provides school readiness lessons, nutrition and cooking activities, literature and art experiences as well as valuable play interaction for children. The Learning Beyond the Classroom bus provides fresh fruit and vegetables and other basic necessities that the family may lack at each stop. The goal of the bus is to reach the at-risk populations of Garrett County and bring services to them that help the family as a whole.

Strategy Description:

The Learning Beyond the Classroom (LBTC) bus travels to ten (10) sites throughout Garrett County during the third week of every month. These sites have been determined to have a high percentage of children ages 0-5 that are not currently enrolled in an early care program. Most of the participants of the program live ten miles or more from the nearest grocery store and have limited transportation resources. The population was identified based on low-income housing environments and proximity to food. By focusing on children from birth to age five, the LBTC bus reaches target areas serving families of poverty and lower income levels throughout Garrett County.

Strategies and Objectives:

Strategy #1: Help improve equity by serving low-income areas with healthy food and snacks

Objective #1: Identify at least three low-income areas and provide healthy food and snacks to each by September 30, 2021

Objective Time-Frame Target Measure: How Much: # of LBTC events completed in underserved, low-income areas addressing preparation of healthy meals and snacks

Objective Time-Frame Target Goal: 10

Objective Time-Frame Target Date: 2021-09-30

Health Improvement Strategy

Local Care Team

<https://mygarrettcountry.com/groups/local-management-board/local-care-team/>

Goal:

The Garrett County Local Care Team (LCT) ensures that children/youth and their families with intensive needs receive necessary support and resources to live a successful life.

Strategy Description:

The Garrett County Local Care Team helps children and families to identify their individual needs and coordinate assistance through referrals to local agencies. The LCT initiates inter-agency discussions and problem solving for individual family needs as well as systemic needs. The LCT refers children and families to Care Management entities when appropriate as well as local and community resources. The LCT identifies and shares resource development needs with the Care Management entity, Local Care Teams and local Core Service Agencies/Behavioral Health Authorities concerning how to best help the family. The LCT can discuss a request for voluntary placement for a child with a diagnosed developmental disability or mental illness.

Strategies and Objectives:

Strategy #1: Increase referrals of new cases to the Local Care Team

Objective #1: Launch a promotional campaign to increase referrals to at least 5 by September 30, 2021

Objective Time-Frame Target Measure: How much: # of new cases referred to the Local Care Team

Objective Time-Frame Target Goal: 5

Objective Time-Frame Target Date: 2021-09-30

Health Improvement Strategy

Maryland Health Connection

<https://mygarrettcountry.com/groups/maryland-health-connection/>

Goal:

To ensure access to health care services through enrollment of all eligible pregnant women, children, and adults whose income makes them eligible.

Strategy Description:

The Garrett County Health Department's (GCHD) Maryland Children's Health Program (MCHIP), Eligibility Determination Unit provides eligibility determinations for the Maryland Children Health insurance coverage per the Maryland Medical Assistance Program (Medicaid) Monthly Income and Asset Guidelines.

Strategies and Objectives:

Strategy #1: Enroll more people into MCHIP and Medicaid

Objective #1: By September 30, 2021 the eligibility determination unit will enroll at least 7,000 people into the programs.

Objective Time-Frame Target Measure: 5) # Garrett County Residents Enrolled in Free or Low-Cost Insurance through Maryland Health Connection

Health Improvement Strategy • PREVENTION • TREATMENT • RECOVERY

Opioid Intervention Team

<https://mygarrettcountry.com/groups/opioid-intervention-team/>

Goal:

Develop a unified strategy to reduce non-fatal and fatal overdoses

Strategy Description:

The purpose of the Garrett County Opioid Intervention Team is to address the opioid and other drug epidemic in order to prevent overdose deaths and halt the spread of the drug epidemic in the community through prevention, enforcement, intervention and treatment/recovery. The mission of the Garrett County Opioid Intervention Teams is to 1) develop a unified local strategy; 2) conduct operational coordination with all stakeholders; and 3) work cooperatively in conducting holistic intervention and response operations to reduce the number of fatal and non-fatal opioid overdoses on an operational and tactical level. Organizational Structure Garrett County's Emergency Manager and Health Officer will serve as Co-Leaders Members shall include: The Garrett County Administrator The Garrett County Sheriff The Barrack Commander of the Maryland State Police or designee The Director of Garrett County Social Services The Garrett County Superintendent of Schools The Garrett County State's Attorney The Garrett County EMS Chief The CEO of Garrett Regional Medical Center The Garrett County Supervisor for Probation and Parole The Garrett County Supervisor for the Department of Juvenile Services The Director of the Garrett County Behavioral Health Authority The Garrett County Health Department's Public Information Officer The Garrett County Health Department's Prevention Coordinator The Garrett County Health Department's Treatment Supervisor Local medical provider(s) Stakeholder State Agencies, such as MEMA

Strategies and Objectives:

Strategy #1: Conduct operational coordination with all stakeholders

Objective #1: Ensure EMS refers each Opioid related patient to behavioral health services by September 30, 2021

Objective Time-Frame Target Measure: 6) Number of EMS referrals to behavioral health

Objective Time-Frame Target Goal:

Objective Time-Frame Target Date: 2021-09-30

Health Improvement Strategy

Oral Health Outreach

<https://mygarrettcounty.com/groups/oral-health/>

Goal:

Prevention of untreated dental caries in adults and youth

Strategy Description:

1. Dental health education for children in head start, Judy centers and schools.
2. Fluoride rinse for children who do not have access to a fluoridated water source.
3. Dental prophylaxis and treatment in the Garrett County Health Department dental clinic.

Strategies and Objectives:

Strategy #1: Increase the number of children receiving dental education by providing virtual options

Objective #1: Provide at least 1,000 children dental education using both traditional and virtual models by June 1, 2021.

Objective Time-Frame Target Measure: 2) Number of children receiving oral health education.

Objective Time-Frame Target Goal: 400

Objective Time-Frame Target Date:

Measure	Target Goal	Status	Desired Trend	Contributor	January 2021	February 2021	March 2021	April 2021	May 2021	June 2021	July 2021	August 2021	September 2021	October 2021	November 2021	December 2021

Community Dent Health. 2016 Jun;33(2):164-7. Do 'poor areas' get the services they deserve? The role of dental services in structural inequalities in oral health. Harris RV. Abstract All over the world, we see that communities with the greatest dental need receive the poorest care—a truism first summarised by the Inverse Care Law in 1971. Despite efforts to attract dentists to under-served areas with incentives such as 'deprivation payments', the playing field is still uphill because of the fundamental inequalities which exist in society itself Deep-seated cultural values which are accepting of a power difference between the 'haves' and 'have nots', and that emphasise individualism over collectivism, are hard to shift. The marketization of health care contributes, by reinforcing these values through the commodification of care, which stresses efficiency and the transactional aspects of service provision. In response, practitioners working in deprived areas develop 'scripts' of routines that deliver 'satisfactory care', which are in accord with the wishes of patients who place little value on oral health but which also maintain the viability of the practice as a business. A compliance framework contrasting types of organisational (dental practice) power (coercive, utilitarian, normative) with types of patient orientation (alienative, calculative, moral) identifies where certain combinations 'work' (e.g. normative power—moral orientation), but where others struggle. Thus institutional structures combine with patients' and the wider community's demands, to generate a model of dental care which leaves little scope for ongoing, preventive dental treatment. This means that in poor areas, all too often, not only is less care available, it is of lower quality too—just where it is needed most. J Mich Dent Assoc. 2016 May;98(5):34-6. ACCESS TO CARE: 12 Tips to Help You Treat Healthy Michigan Plan Patients. Knowles L. PMID: 27333699 [Indexed for MEDLINE] Early Hum Dev. 2017 Sep 9. pii: S0378-3782(17)30455-3. doi: 10.1016/j.earlhumdev.2017.09.009. [Epub ahead of print] Risk factors for dental problems: Recommendations for oral health in infancy. Wagner Y1, Heinrich-Weltzien R2. Author information Abstract Primary care providers, gynaecologists and paediatricians have to be aware of the importance of oral health in infancy and possible consequences for child's development, growth, health and quality of life. Oral diseases, particularly dental caries, developmental defects of the dental tissues and periodontal or orthodontic issues have a complex and interrelated aetiology with common, primarily behavioral based risk factors. A sugar-rich diet is the key risk factor with detrimental consequences for general and oral health, particularly in combination with an insufficient oral hygiene. Therefore, daily tooth brushing with fluoride toothpaste and reducing of sugar intake are the key pillars to prevent oral diseases, including a positive effect on numerous chronic diseases. Future preventive approaches should focus on pregnant women and mothers of infants with a common vision of health and a shared responsibility for children's oral health care to promote healthy lifestyles and self-care practices in families. Health Improvement Strategy

Overdose Response Training

<https://mygarrettcountry.com/groups/opioid-intervention-team/overdose-response-training/>

OVERDOSE

Goal:

Reduce and/or prevent opioid overdose deaths in Garrett County.

Strategy Description:

Reduce and/or prevent opioid overdose deaths in Garrett County through distributing naloxone in the community and educating the community on administration and follow-up steps. To accomplish this the group will. Advertise the Overdose Response Training (ORT) classes to the community. Provide classes in a variety of locations and on demand. Distribute naloxone after the completion of training. Work with other organisations to distribute naloxone in high risk settings.

Strategies and Objectives:

Strategy #1: Provide classes in a variety of locations and upon request

Objective #1: Provide at least one class per month in various locations around Garrett County and increase distribution of naloxone by 10% by September 15, 2021..

Objective Time-Frame Target Measure: 1) # of Training's

Research:

According to the results of a recent systematic review published in the Annals of Internal Medicine, 2 mg/mL intranasal naloxone may have comparable efficacy and tolerability to intramuscular naloxone. After overdose reversal, the benefits of transport to a hospital remain unclear. Researchers evaluated cohort studies and randomized trials that compared naloxone dosing, administration routes, and transport to a hospital after opioid overdose. Mortality, reversal of overdose, recurrence of overdose, and harms were the main outcomes assessed. Higher-concentration intranasal naloxone (2 mg/mL) was shown to have similar efficacy to intramuscular naloxone (2 mg) in one trial. In another trial, lower-concentration intranasal naloxone (2 mg/5 mL) was associated with lower effectiveness but reduced risk for agitation compared with intramuscular naloxone.

Health Improvement Strategy

Partners After School @ Oakland

<https://mygarrettcountry.com/groups/partners-after-school-oakland/>

Goal:

Serve 30 students per night in third through eighth grade from Southern Middle School, Broad Ford Elementary School, and Yough Glades Elementary school at the PAS program who are affected by incarceration and childhood hunger.

What/How Much We Do:	
# of students served by PAS @ Oakland, per SY	
# of students served 30 for more days, per SY*	
# of parent/other adult volunteer hours, per SY (includes AmeriCorps tutors)*	
# of program staff who have completed YPQA Basics training	
# of healthy eating presentations, classes, trainings, or interactions	
# of physical activity presentations, classes, trainings, or interactions	
# completing PHLC healthy eating challenge	
# completing PHLC physical activity challenge	
# completing PHLC screen time challenge	
How Well We Do It:	
#/% of students attending PAS 30+ days w/satisfactory school attendance (<16 days absent during the SY)*	
#/% parents satisfied with PAS @ Oakland, per SY	
#/% of students attending 30+ days with at least 1 parent attending 2 or more PAS activities*	
Average daily attendance	
Is Anyone Better Off?:	
#/% of students served 30+ days in grades 3-8 who achieve grade level or better in a) Reading/English and b) Math/Algebra*	
#/% of students served 30+ days in grades 3-8 who achieve proficient or better in a) Reading and b) Math as measured by the MCAP Diagnostic or other standardized testing instrument*	
#/% of students served 30+ days with NO disciplinary referrals, suspensions, or expulsions during the SY	

#/% of participants who report increase in self-sufficiency *	
#/% of participants who report a reduction of food insecurity*	
#/% of participants who report increased awareness of ACEs*	
#/% of participants who report an increase in food/meal availability*	
#/% of participants that increase knowledge of healthy eating and physical activity from pre to post-test	
#/% of participants that increase knowledge of tobacco, alcohol, and Rx drugs from pre to post-test	
#/% of participants that increase daily fruits and vegetables, daily physical activity, and daily water intake from pre to post-test	
YPQA program self-assessment score for Safe Environment domain	
YPQA program self-assessment score for Supportive Environment domain	
YPQA program self-assessment score for Opportunities for Interaction domain	
YPQA program self-assessment score for Engagement domain	
YPQA Total program self-assessment Score (avg. of the 4 domains above) by program/site	
YPQA total programs/sites with completed YPQA program assessments that have submitted a Program Improvement Plan.	

*Indicates GOC tracked performance measures

Strategic Goals
Reduce the impact of parental incarceration on children, families, and communities.
Improve outcomes for disconnected/opportunity youth.
Reduce childhood hunger.
Reduce youth homelessness.
Increasing trauma-informed services and preventing Adverse Childhood Experiences (ACEs)
Increasing opportunities for diversion from the juvenile justice system; and/or
Preventing out-of-state placements*

Strategy Description:

Pre COVID PAS will operate Monday- Friday from 3:15 pm- 6:00 pm providing 30-45 minutes of recreation-physical activity/exercise and play. 45 minutes of homework and tutoring and also provide the students with a meal (provided from the SMS Cafeteria/ Board or Education). In correspondence with the University of Maryland Extension and the Adventure Sports Program at Garrett College enrichment activities will happen throughout the school year. Field trips, family meals and training also happen throughout the school year to promote positive parenting and interaction between children and their parents/guardians. Staff of the Partners After School (PAS) Program at Oakland will conduct outreach to the following agencies, who are aware of the PAS Program at Oakland, to increase participation and recruitment for in PAS from the Strategic Goal populations (children impacted by incarceration or hunger): Garrett County Extension Office – Food Stamp Nutrition Education (FSNE) Program PAS Director will meet with the Nutrition Educator at the Garrett County Extension Office to enlist her support in promoting PAS to all her clients. The Nutrition Educator offers FSNE programs to support the work of community agencies serving low

income families and may offer programming to: Public schools where 50% or more students qualify for free or reduced school lunch (or community agencies located within these school districts), community agencies servicing food stamp eligible audiences, and local food banks, soup kitchens, homeless shelters, etc. PAS Director will provide promotional flyer to distribute at every FSNE presentation that targets families from the schools served by the PAS@Oakland program. Western Maryland Food Council Western Maryland Food Council, in one of its roles, acts as a clearinghouse of information about free food resources in Western Maryland counties. The PAS Director will stay in contact with the Food Council to maintain an up-to-date list of Garrett County free food resources, and then will outreach to those contacts which currently include the following: Food Connect at St. Peter the Apostle Parish House of Hope food pantry and monthly dinners Garrett County Community Action food pantry Mountain Laurel Medical Center (Federally Qualified Health Center) food distribution site Mountain Top Food Pantry Garrett College S.I.N.G. Food Pantry Calvary Tabernacle food pantry Loch Lynn Church of God food pantry and Feed the Flock dinners It's in the Bag, backpack ministry program Oak Park Church of the Brethren monthly meals Matthew's Episcopal Church Stephen's Table community suppers Divine Hope Church community soup kitchen Christ Lutheran Church weekly community meals Hoyes United Methodist Church monthly spaghetti dinners Summer Feeding Program through Board of Education PAS Director will ask a contact person from each food resource group to share the promotional flyer with families that attend or access the food resources. Garrett County Department of Social Services PAS Director will meet with various staff of Social Services to enlist their support in sharing information about the PAS program to clients. Social Services programs to be included are foster care, child support services, Supplemental Nutrition Assistance Program, Temporary Cash Assistance Program, and Temporary Assistance to Needy Families Program. PAS Director will provide promotional flyer to distribute to each potential family that could benefit from the PAS Program. Social Services staff will be educated about the enrollment process for the after school program so that they can assist the families as needed. Garrett County Parole and Probation PAS Director will meet with the staff at Garrett County's Parole and Probation office who are responsible for supervising parolees, probationers and those on mandatory release from the correctional facilities to make them aware of the services provided by PAS and to enlist their support in promoting PAS to all their clients. PAS Director will provide promotional flyer to distribute to each potential family that could benefit from the PAS Program. Parole and Probation staff will be educated about the enrollment process for the after school program so that they can assist the families as needed. Garrett County Public Schools PAS Director will meet with the principals, vice principals, and/or guidance staff at Broad Ford Elementary School, Yough Glades Elementary School, and Southern Middle School to make sure that they understand the Strategic Goal targeted populations in order to effectively assist in promoting PAS to those students and their families. Staff will be asked to share the promotional flyer with all targeted students and their families over the course of the school year through day to day interactions, school events, or school mailings. PAS Director will work with school staff to send home a promotional flyer with applications for Free and Reduced Meals Garrett County Dove Center The Dove Center provides shelter services for women and children who have left their primary residence due to a domestic violence experience or other traumatic experience. Additionally, the Dove Center provides shelter for homeless women and their children, without requiring evidence of leaving a domestic violence incident. PAS Director will meet with the staff at the Dove Center to make them aware of the PAS Program and how to refer or enroll students from the targeted schools that come into contact with Dove Center services. These services include individual and group counseling and emergency shelter to victims of domestic violence. Those families who are accessing the emergency shelter are impacted by childhood hunger and often time by incarceration of a family member. PAS Director will provide promotional flyers to distribute to each potential family that could benefit from the PAS Program. Garrett County Health Department PAS Director will regularly share information about recruitment and referral into the PAS@Oakland Program with the divisions of the health department that come into contact with families that may be impacted by incarceration or be facing hunger issues. These include the following: Women, Infants, and Children Program Early Care Home Visiting Program Dental Program Personal Health Services such as immunization and family planning Behavioral Health Services including Substance Abuse and Mental Health PAS Director will provide promotional flyer to distribute to health department clients that could benefit from the PAS Program. Health department staff also have the option to give a warm hand-off of clients directly to the after school staff that are housed within the agency. In addition to outreach provided to partner agencies, PAS staff will also attend Back to School Night at each of the three target schools in order to make parents aware of the after school program, eligibility criteria, services and activities provided.

Strategies and Objectives:

Strategy #1: Ensure families that are food insecure have access to available resources

Objective #1: All enrolled students and families will be given up to date information regarding availability of food resources within the first month of attendance.

Health Improvement Strategy

Prevent and Reduce Tobacco Use

<https://mygarrettcountry.com/groups/prevent-and-reduce-tobacco-use/>

Goal:

Prevent and reduce nicotine use.

Strategy Description:

Staff of Health Education and Outreach use strategies like campaigns, coalitions, community education, after school programs, parent education, policy change initiatives, school health and wellness, worksite wellness, and Youth in Action Teams to promote healthy habits and reduce risky behaviors related to nicotine use.

Strategies and Objectives:

Strategy #1: Increase participation in the GCHD Quit Now Program

Objective #1: Serve 50 Garrett County residents through the GCHD Quit Now Program by Aug. 1, 2021

Objective Time-Frame Target Measure: # that start 6 week cessation program

Objective Time-Frame Target Goal: 50

Objective Time-Frame Target Date: 2021-08-01

Health Improvement Strategy

WIC Breastfeeding Support

<https://mygarrettcountry.com/groups/wic-breastfeeding-support/>

Goal:

Increase both the percentage of infants in WIC being breastfed, and increase the percentage of infants exclusively breastfed.

Strategy Description:

1. Certification within 3 days of hospital discharge. 2. Support exclusivity through education and support. 3. Referral to IBCLC if any factors identified which may affect continued breastfeeding. 4. Schedule breastfeeding families according to local procedures.

Strategies and Objectives:

Strategy #1: Referral to IBCLC if any factors identified which may affect continued breastfeeding.

Objective #1: Referral cases will be addressed by the LBCLC within one day to encourage continued breastfeeding by September 30, 2021.

Health Improvement Strategy

WIC Nutrition Increases Fruit and Vegetable Consumption

<https://mygarrettcounty.com/groups/wic-nutrition-increases-fruit-and-vegetable-consumption-1738748979/>

Goal:

Improve fruit and vegetable consumption in WIC Participants

Strategy Description:

Target nutrition education on importance and acceptance of fruits and vegetables in family diets. 1. Individual counseling with families during certification and recertification on health benefits of consuming fruits and vegetables. 2. Quarterly nutrition education program about use of fruits and vegetables. 3. Provide Farmer's Market coupons to eligible families for local produce. 4. Supplemental clinic and promotional materials available during appointments and in waiting areas. 5. Individualized discussion based on individual family usage of fruit and vegetable benefit.

Strategies and Objectives:

Strategy #1: Individualized discussion based on individual family usage of fruit and vegetable benefit.

Objective #1: Reduce amount of unspent benefit dollars to under 2,000 by individualized discussions by September 30, 2021

Objective Time-Frame Target Measure: Benefit \$ unspent Garrett

Health Improvement Strategy

WIC Program Service Delivery

<https://mygarrettcountry.com/groups/wic-administrative-management/>

Goal:

Through the provision of services by the WIC Program, families at risk of food insecurity will have access to nutritious foods, nutrition education, breastfeeding support, and referral sources to reduce the this insecurity.

Strategy Description:

WIC will provide clinical services to all eligible participants in Garrett County. WIC will monitor participation compared to enrollment to monitor families' access to benefits. WIC will monitor clinic no show rates for trends in participation. To minimize barriers to access, WIC will utilize alternate clinic participation modalities to permit participants to receive their benefits.

Strategies and Objectives:

Strategy #1: WIC will provide services to all eligible participants

Objective #1: WIC will have 695 individuals enrolled in the program monthly.

Objective Time-Frame Target Measure: Monthly enrollment

Objective Time-Frame Target Goal: 875

HEALTH ASSESSMENT

OVERVIEW

Because Health Equity Matters

We each have our own ideas about what it means to be healthy, what we feel the biggest issues are for ourselves, and the community we live in. Unfortunately, the issues we face depend dramatically on what we're able to afford. When we think about health, it cannot be adequately discussed without acknowledging that our health is fundamentally affected by our income. Concerns like: affordability of health insurance, adequate treatment services to address mental health issues, honestly looking at how addiction can happen to anyone in a community, and addressing food insecurities, which left unchecked, can deeply impact a community overtime. Every community chooses to confront these challenges in different ways that reflect the varying sensibilities and priorities of the people who live within it. What is consistent, however, is that a community is better equipped to make informed decisions regarding policies and strategies, and is poised to respond together when data is shared transparently across sectors. Once we all have the most accurate and up-to-date information we can continue doing what works and begin to create new opportunities for a prosperous future.

Shelley Argabrite, M.A.
Chief Health Strategist

John Corbin
Informatics Administrator

The Community Health Assessment contained on the following pages provides the most accurate information available to us at this point in time. This document is a summary of work that has continued since the previous assessment publication in 2016.

The United States National Forum on Information Literacy defines information literacy as "... the hyper ability to know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand." Our goal is to provide the best quality information currently available to our community, so they can intelligently and actively participate in the decisions that impact them.

The Population Health, Innovation & Informatics Unit within the Garrett County Health Department thanks the organizations that contributed to this assessment and encourages our partners to use it to inform planning to make Garrett County a healthier place to live, work and play. Please join us as we endeavor to make a difference in our community by participating on mygarrettcountry.com.

EXECUTIVE SUMMARY

2019 Garrett County Community Health Assessment

This Community Health Assessment is simply a slice in time of a dynamic process contiguous with our efforts to make a difference in the lives of those we serve. Great care and attention was placed on collecting as much data as possible from the many subsections within our community. Expertise was garnered from NACCHO's MAPP guidelines and documentation to ensure rigorous standards during our needs assessment process.

"Assessing our community is vital to understanding how we can better serve, layering the data that's available with our own primary sources creates a platform for responsive action."

- Robert Stephens, Garrett County Health Officer

Extensive research was conducted from April 13th through August 13th, 2019. We conducted 10 focus groups and analyzed responses from 2,102 web based and paper surveys completed by staff, community organizations, and stakeholders. We also evaluated secondary sources of information about our community. The assessment included the social determinants of health, which are factors like employment, housing, transportation, etc... that affect the health of the community, and are vital to improving population health.

The Health Planning Council, the Assessment Planning Committee, and many community members all played key roles in pulling this information together for this report. We are pleased to publish this document and wish to convey gratitude for all those who took an interest and spent valuable time making this possible.

We more than doubled our participation from the previous assessment efforts, with 2,102 people participating in the focus groups and community survey, making this sample size statistically significant for our county! In addition to county wide significance, we had all but two zip codes with enough participation to count them as statistically significant in our analysis. This outstanding turnout of community participation on a primary data collection level enables us to develop robust and culturally informed improvement strategies based on accurate prioritization.

HEALTH ASSESSMENT

RESULTS

Thousands of Voices, One Vision

In order to best understand the status of health in our communities, it's critical that we gather, analyze, and seek to understand the issues in our communities and how people perceive them.

Community health assessments typically use both primary and secondary data to characterize the health of the community:

- **Primary data** refers to the first-hand data gathered by the researcher themselves, is real-time and is often collected first-hand through surveys, and focus groups.
- **Secondary data** refers to data collected by someone else, in the past for another entity and/or purpose.

Balancing these data sources helps illustrate the most complete picture of our community, and its ever evolving people, resources, and needs.

Immediately following are the aggregate results of our community prioritization survey that was conducted both county-wide and regionally to collect primary data on community-driven need identification, down to the zip code level.

Additional primary data was collected through a series of focus groups. The qualitative data from all of the groups have been analyzed and is summarized following the prioritization report.

*Reference CHArp tool in the Methodology section for more information about current statistical validity of small samples.

REGIONAL SURVEY RESULTS

These results reflect the responses of regional participants. Additional data, tables, and tools for this dataset, as well as Garrett County datasets are provided in the supplement.

FOCUS GROUP ANALYSIS

Conversations Run Deeper

Focus groups were held in a guided conversation format about the top five issues people identified as their main concern in our latest community prioritization survey. The top priority identified on the survey in the region, the entire county, and in every zip code, with the exception of Kitzmiller, was Jobs, Wages, & Economic Development.

This priority and the themes central to **Jobs, Wages, & Economic Development** that have been synthesized from the focus groups are consistent with data provided in this report. There is a generalized fear that our towns are "dying" due to population decline, lack of affordable housing, school closures in communities, and a lack of competitive job opportunities. Conversation about how to keep our young people in the area and offer them a way to thrive was a significant portion of every focus group. High speed internet that is both available and affordable to the entire county was both a consistent complaint and offered as a strategy. If high speed internet was available in every area of the county it could support job growth and people being able to work remotely for larger employers and remain in the area (tele-work). Some focus groups made the direct correlation between higher incomes and improved health outcomes, stating when you "have enough money, and a safe environment, the opportunity to live a healthier life is greater than those without."

Health Insurance as a priority was high ranking, second in the region, third in the county and, second for four of the zip codes, first in Kitzmiller. The consensus around this priority from the focus groups is that those working lower paying jobs could not afford the insurance plans offered by their employers so they typically don't have any insurance at all. Additionally, there were those who currently have insurance, but were concerned about future costs and being able to afford care later in life.

Substance Abuse continues to be a priority, ranking third in the region, second in the county and second for three of the zip codes. It's important to remember this category is broad and includes opioids, prescription medications, alcohol, tobacco, and other drugs. The conversations were as broad as the category itself. Those with personal experiences spoke bravely about how hard it was to receive proper treatment and that there are not adequate resources, especially for youth. Those who haven't had first hand experience reported watching neighbors sell drugs and senior citizens sell pills so they can afford to eat. They spoke of grandparents raising grandchildren, and the hardship of drug affected children on the education system. A hardship on employers was also reported.

FOCUS GROUP ANALYSIS

Community Composition

Education as a priority ranks fourth both in the region and in the county. Attention focused in two main areas: the public school system and vocational opportunities for youth in the county. Questions concerning appropriate resource allocation was a common theme, with better pay for quality teachers, and the concern of more school closures. Communities that have lost their elementary schools spoke of the compounding negative effects. The threat of school closures for other communities was also common and perceived to be what will take away all hope from any growth that may occur in the area. The burden of behavioral issues presenting in classrooms due to increased drug use overlaps with the substance abuse priority. However, in this context it was spoken about as concern for the teachers not having the resources - either the capacity and/or extra help in the classroom and the potential to compromise the education of other students. Training in vocational areas where students are taught a trade, in some cases including certification such as journeyman or welder, was discussed as an opportunity to make our area more attractive. Although it was noted we have vocational programs in the high schools, the consensus was that the programs are underfunded and the options for going further are very limited. Free tuition at Garrett College was perceived as a tremendous benefit, but for those who can't or don't want to transfer for a higher degree, the ability to earn a living wage without skilled trade is often difficult. With the cost of college completely out of reach for many families and the shortage of skilled labor this was an area communities wanted to explore further.

Mental Health ranks fifth both in the region and county on the consumer surveys. Digging deeper into this topic in the focus groups proved to be quite complex making it difficult to identify themes. However, a theme that carried over from 2016 was that mental health services are still insufficient, and despite high demand, the root of the problem is lack of access – or the ability to find care. Psychiatry is elusive and non-existent for youth, and tele-psych was reportedly still unreliable due to internet connection, billing, and insurance issues. Although there has been an effort to expand services in the area, many still feel as though it's difficult to receive proper treatment.

FOCUS GROUP ANALYSIS

Challenges Voiced During the Focus Groups (Direct Quotes)

"We have nothing here to keep young people in the area."

"Do we have a trade school in the county? I'm not talking about a driving school."

"You can get healthier with higher incomes, we're making progress — "

"My concern is the next 5-20 years, do we have the next generation or two behind us to attract and keep?"

"I have a good job-but the broadband thing-although my job allows me to work from home, I can't."

"This town is really dwindling – the school is gone, no one is moving into town- it's going to be a ghost town."

"Lack of high speed internet around the county- how do we move into the future? It effects tourism, giving people tools—so many opportunities are online."

"I wish I knew who to complain to so it would make a difference."

"Disparity of affordable housing - I'm not talking about subsidized housing, \$900 a month for rent or more is not affordable."

"What is my retirement going to look like? Trying to guess at what my medical needs will be and if I have medical concerns- will I be destitute without the insurance?"

"Health Insurance? We can't afford it."

"My kids have it through the state but it's still not enough."

"We pay our own way."

"I'm a transplant- I still don't feel like I belong after 25 years. That's what people who are born here call me, a transplant."

"People don't respect one another."

"People don't have open minds."

"I married a native but my friends are not."

FOCUS GROUP ANALYSIS

Challenges Voiced During the Focus Groups (Direct Quotes)

"It's the kids that grow up and are even born addicted. Drugs and what they do to the kids is the saddest part."

"Highest level of our society – grandparents are raising kids– affluent people."

"Senior citizens are selling their drugs for food."

"Parents in the schools need more education, alcohol is just as bad."

"Insurance didn't go out of the state."

"If you haven't been around other races you just don't know how to act"

"A lot of people drink too much."

"House was broken into and the only thing that was stolen was whisky."

"Meth was big- but they arrested the two dealers."

"If people had hobbies, or play sports that might help-It gives me purpose. If they find something they are passionate about...."

"Addicts and seniors are mixed together in housing."

"Judgmental about people who use drugs. Addiction is not a choice-"

"People can't pass a drug test."

"They need to focus on the elementary school -they keep talking about shutting it down. The bank and the post office will probably leave too. If you don't have a school- you don't have a community. It's shortsighted of them to close the school."

"We lack psych. Telepsych - if the internet goes down it's hard for mental health patients. It's bad for adults and even harder for adolescents. It's much more stigmatized in a small community."

"We have more problems than people realize."

WHAT DO YOU LOVE ABOUT LIVING IN GARRETT COUNTY?

"Sense of community- everybody is related—they watch out for your kids"

"Strong volunteer base"

"Church involvement"

"Great senior site that provide much needed meals"

"Outdoor activities"

"Very friendly, waving, and polite, skies are very blue, hear birds, no smog"

"If there is a need this community comes together."

"Slower pace and four distinct seasons."

"We love our land, space, very neighborly but there is still space."

"Good area to feel safe and watch wildlife and walk in the woods. People are so friendly and kind and willing to help."

"An experience that's hard to appreciate unless you've lived elsewhere"

"The spirituality of the mountain."

"There are kind people, always someone watching out for you."

FOCUS GROUP ANALYSIS

Longing for Respect & Belonging

In contrast to this theme, discussions with those that have had dissimilar experiences in small towns in the county were explored. This quote taken from a focus group may challenge your perspective,

“there is a difference between a polite community and one that truly embraces a person.”

If you’ve never been the person treated differently, it may be difficult to understand. However, when asking the open-ended question about what makes a community healthy, the notion of the need for belonging kept surfacing. Regardless of whether you are from the area or not, being different in any way is perceived as a risk or disadvantage in Garrett County.

One person put it this way,

“it’s a safe community for everyone, unless you’re on the margin.”

A call for open mindedness and general respect for people was recorded multiple times in the various focus groups.

MOUNTAIN MARYLAND GATEWAY TO THE WEST Garrett County, Maryland

GARRETT COUNTY

Our Health

SECONDARY DATA ASSESSMENT

Transportation

Garrett County has a legacy as one of Maryland's most significant recreational areas, even dating back prior to the 20th century. It's natural beauty and resources inspired Native Americans, early settlers, and people from all walks of life including American presidents and prominent historical figures. Lush recreation trails abound throughout the county and today, Deep Creek is still a popular destination for some of several activities, including horseback riding, fishing, and hunting.

- Hiking & Biking Trails
- Horseback Riding
- Deep Creek Lake

Man and Nature

Highlighting the unique natural resources which Garrett County has traditionally acknowledged and respected including coal, timber, and agriculture. In particular, the County has a unique landscape because it marks the Eastern Continental Divide in Maryland, which forms the border between the Appalachian Mountains to the west and the Piedmont region to the east. This unique landscape is a natural resource which has been preserved in the area.

- 4 State Parks & 2 State Forests
- 100 miles of scenic Byways
- Coal Heritage Trails available at Garrett College
- Kennelton & Shafter
- Sunnyside Tours
- Working Farm Tours
- Mountain Mill

Gate to the West

The overall heritage of Garrett County is a unique blend of the 18th and early 19th century and the 20th century. In fact Garrett County's Gateway to the West is one of the country's most scenic and beautiful areas for travelers and tourists. The Mountain Maryland Gateway to the West Heritage Area is best characterized by its scenic beauty, transportation, Man and Nature, Historic Recreation, and its naturally Unique resources.

OUR HEALTH

Secondary Data Analysis

In today's digital environment, data is more accessible than ever, and emerging innovations, such as the Garrett County Planning Tool (mygarrettcountry.com), present tremendous opportunities to better understand the constructs at work within our communities.

The supplemental datasets highlighted throughout this document are assembled snapshots from a broad sweep of community, regional, state, and federal data warehouses, and are provided for reference. These resources are designed to be investigative prompts, rather than exhaustive datasets.

Many of these reports and datasets were aggregated from numerous sources, and often, compared across state and regional boundaries to better illuminate the disparities that exist within different data frames. This means that some data may not be an exact match, and further analysis may be needed to flush out the differences in reporting across jurisdictions (i.e.; broadband access matches, Maryland vs. West Virginia vs. federal reporting, et cetera) .

All information, data, tools, and materials contained within this report are provided without warranty. While every attempt was made to verify data throughout the process, many datasets, archives, and agencies sourced throughout are still striving to improve data quality and consistency in reporting.

The reports that follow were assembled with resources from secondary sources, and should not be considered conclusive or valid, nor interpreted for use, without reconciliation and verification outside of the discussion and supplements within this document. This report is the first attempt to reconcile these datasets, and results/data points may evolve or change over time, or as additional information becomes available.

Verification and further research are vital to ensuring that data provides transparency and promotes the most effective and efficient courses of action for community health improvement.

OUR HEALTH

Community Composition

Garrett County is a unique rural community situated in the westernmost corner of Maryland. According to the census, it is a large county with a geographic base of 656 square miles, and 46.5 persons per square mile (US Census, 2010). Our low population density ranks Garrett County as the third least populous county in Maryland. Natural beauty abounds with plenty of open space to enjoy with over 98,276 acres of parks, lakes and publicly accessible forestland.* The county is bordered by West Virginia and Pennsylvania and is considered a tri-state area.

According to the 2017 ACS 5-year population estimate, the population of Garrett County was 29,516 - continuing to decrease from 30,097 reported in 2010. This is important to note because population loss is one of the main indicators of a weak regional economy.** Only 15,720 people made up the labor force in Garrett County, a regionally small proportion relative to total population (more info in Regional Indicators Supplement). The migration of young people to urban areas coupled with aging populations continues to be a challenge for our region; however, a comprehensive secondary data analysis indicated that local systems of support are more aptly prepared to address rapidly aging populations than most, excluding economic concerns and health insurance.

Median household income hit an all time high in 2018 for the nation and Maryland was ranked the wealthiest state, with a median household income of \$83,242. Garrett County remains well below that at \$48,174. This more closely aligns us with our neighboring state of West Virginia, which is one of the poorest states with a median income of \$44,061. The population of West Virginia fell by 2.5% over the past eight years, the largest decline of any state. An article analyzing the richest and poorest states noted, "the GDP of West Virginia increased by just 1.8% a year on average — less than half the 4.1% national growth rate. Like the nation as a whole, the largest drag on economic growth was the state's mining sector."*** Related to this for our region was the 131 year old Luke Paper Mill closure, a devastating blow to the Western Maryland region. Reported job loss from VERSO was 675 in June of 2109. However, that does not account for the industry support jobs, many of whom were small companies or self-employed individuals. It remains to be seen just how deeply this closure will impact the people in our region, and how long it will take to recover.

OUR HEALTH

Affordable Housing Impacts

Ensuring that everyone has a decent place to live is vital to improving population health. The affordable housing debate is one of many that is a topic of concern not only nationally, but also here at home. Simplicity is not the cornerstone of this debate, as there are layers of complexity that confound solutions.

The National Low Income Housing Coalition publishes a report annually showing the "housing wage" that a person would need to earn full time (40 hours a week, 52 weeks a year) in order for a two-bedroom rental unit to be affordable by the official government standard. The report states, "In the United States, the 2014 two-bedroom Housing Wage is \$18.92. This national average is more than two-and-a-half times the federal minimum wage, and 52% higher than it was in 2000. In no state can a full-time minimum-wage worker afford a one-bedroom or a two-bedroom rental unit at Fair Market Rent."*

We naturally ask the questions, affordable for who and how many units are available for rent in the region? This was a common discussion that ran across several of our focus groups during this assessment. The federal Department of Housing and Urban Development (HUD) defines an "affordable dwelling" as one that a household can obtain for 30 percent or less of its income. However, this varies from place to place.

Shockingly, affordable housing, a known vital social determinant of health, remains elusive, pending further analysis that illustrated significantly higher Home Purchase Loan Origination by Loan Amounts of Under \$60,000 (Garrett: 4.48%, Allegany: 19.29%) and \$60,000-\$119,999 (Garrett: 18.49%, Allegany: 43.85%). In Garrett County, it is difficult to find a reliable data source to report affordable rental units at any given time. Our vacant property rates are more than triple both national and state rates at 38.24% in Garrett County (more info in Regional Indicators Supplement). This data is a starting place to aid local leaders as they evaluate housing policies, zoning, and other issues related to affordable housing. More data is needed as this complex issue continues to hinder economic growth in the region.

*<https://reports.nlihc.org/oor/2014>

OUR HEALTH

Hidden in Plain Sight

Balancing community priorities with secondary data sources as we seek to be responsive to the needs of the community can be a complex process. In some cases the secondary data supports the community priorities, and in other cases, it doesn't.

Due to the extensive nature of this the report, highlighting a few areas that demonstrate this point is important for broader community coalition conversations in order to work toward reconciliation.

Despite low interest from those surveyed, the first area of concern is sexually-transmitted infections (STIs/STDs). It was rated next to last on the community priority list. However, there appears to be increasing prevalence of diagnoses of chlamydia and HIV longitudinally in the region.

The second area of concern is child maltreatment, which is often defined as physical injury (not necessarily visible) of a child under circumstances that indicate that a child's health or welfare is harmed or at substantial risk of being harmed. Data sources record this differently, so it's important to consider what the sources are measuring, but rates have consistently been one of the worst in the state of Maryland and do not indicate improvement.

A call to action for increased aggregate data sharing on the Garrett County Planning Tool from agencies that track different nuances of the larger issue of child maltreatment is needed. Information about local foster care cases and domestic abuse may help us understand the complexities children and adolescents are facing.

Another area of note is the lack of reliable data around obesity and other chronic diseases, including diabetes. Data that is available does not indicate adolescents or adults prioritize healthy eating habits, exercise, limiting alcohol use, or avoiding tobacco. Further assessment is needed on the efforts that are being made in the community to address these issues.

Substance abuse has remained in the top three priorities from primary data collected through community surveys and focus groups since we began formal assessments in 2016. Chronic Disease remains the main cause of death and significantly surpasses all others including overdoses, yet people are not as concerned with heart disease. This is evident in our primary data results and the extensive programmatic efforts funded by multiple agencies to reduce substance abuse. A cultural shift is needed to reinforce the importance of healthy lifestyles on overall quality and length of life.

OUR HEALTH

State of Health Equity

Despite the traditionally white (96.3%, not Hispanic or Latino), homogeneous population in Garrett County, documentation of severe health inequities among minority populations has provided additional insight as our community composition begins to change. While previous analysis of the region has focused on economic inequities, we are expanding the conversation to include racial and LGB inequities, based on the datasets discovered through expanded research.

Through accompanying supplements, the following critical indicators have been identified:

Garrett County, MD ranked the poorest among neighboring communities for Black or African American (50%) and Other (31.9%) races for No High School Diploma by Race Alone, Black or African American (34.33%) races for Uninsured Populations by Race Alone, and Black or African American (85.71%) races for Population in Poverty by Race Alone (more info in Regional Indicator Supplement).

From 2000 to 2010, the White population in Garrett County decreased, while the Black or African American population increased 135.16% (more info in County Indicator Supplement).

Additionally, the results of the Maryland Youth Risk Behavior Survey (more info in Supplement) point to additional disparities among Gay, Lesbian, and Bisexual youth, indicating that these populations reported, in aggregate, No Difference or More Likely than Heterosexual to experience every risk behavior reported by Maryland through the national YRBS tool designed "to monitor health behaviors that contribute markedly to the leading causes of death, disability, and social problems among youth and adults in the United States."^{*}

While these populations are small comparatively, these statistics present insurmountable difficulties for racial and sexual orientation minorities in our community and warrant further examination and consideration in developing equity-based practices to improve population health.

^{*}<https://www.cdc.gov/healthyyouth/data/yrbs/overview.htm>

OUR HEALTH

Hope on the Horizon

Despite these disappointing findings, there are several promising trends for Garrett County on the horizon.

One of the most important indicators for economic advancement in the modern age is broadband access.* Depending on the report referenced, this range varies greatly (up to a disputed estimate of 100%, including mobile broadband access), and is further compounded by promising innovations and developments, such as the Neubeam initiative in partnership with Garrett County Government to find innovative solutions to increase consistent broadband access throughout the county. Further, the addition of Sprint, a major national carrier to several adjacent counties could provide additional infrastructure upon which to see additional advancements in community access.

In addition to this promising pathway that seems aptly timed to succeed in propelling Garrett County to the front of the line in rural communities primed to compete in the growing remote jobs market, a new indicator has been uncovered that shows additional promise for Garrett County by means of access to transportation. As reported in the accompanying Regional Indicator Supplement, only 6.84% of households lacked access to a motor vehicle in Garrett County, compared to 10.66% in Allegany County. This relatively low figure illustrates the need to isolate the contributing factors to low/no transportation access, as the issue may be more readily resolved or alleviated through niche-targeted methods, rather than difficult systems-level modifications.

Finally, the dedicated efforts of Garrett Regional Medical Center and many local agencies and organizations, including the greatly appreciated Cindy's Fund, may be contributing factors worth further investigation, as Garrett County now has the lowest Age-Adjusted Death Rate for Cancer Mortality (137.5 Per 100,000 Pop.) in the entire sampled region (more info in Regional Indicator Supplement). Garrett County's commitment to cancer treatment and community support should be duly noted and may prove to be an innovation model worth expanding to additional areas, pending further analysis.

METHODOLOGY

The Survey Instrument

The Garrett County Health Department's Population Health, Innovation, and Informatics Unit champions county-wide assessment, planning, and health improvement. These processes are reviewed at public Health Planning Council meetings held once a month at the Garrett County Health Department with a variety of stakeholders. Their mission: to ensure high quality, effective, and integrated community care system that is responsive to the needs of residents. For those unable to attend, every stakeholder and member of the public is invited join us digitally for a transparent look at these processes on mygarrettcounty.com.

In addition to the Health Planning Council meetings, local agencies and key stakeholder groups (consisting of staff from the Garrett County Health Department, Garrett County Local Management Board, Garrett County Behavioral Health Authority, Mountain Laurel Medical Center, and Garrett Regional Medical Center) met on March 12, 2019, to review a sample draft of the survey instrument. In order to ensure that our instrument captured the most valuable information and is equitable in design, this process was extended this cycle to include a one week, anonymous public comment window on the Garrett County Health Department's website at garretthealth.org from March 20 thru March 27, 2019.

Public Review Results

The survey instrument was open for public review from March 20, 2019, through March 27, 2019. The survey instrument review reached 481 people, was reviewed 46 times by 34 unique individuals without request for modification.

METHODOLOGY

Survey Launch

Up to the release event at the Garrett County Health Fair on April 13, 2019, staff, agency partners, and student volunteers equipped with iPads collected 197 surveys from health fair attendees. Email marketing and social ads were the primary modes of outreach utilizing the health department's extensive databases and strategic investments in digital technology, providing a return rate that more than doubled that of the previous assessment. The Community Action, Aging & Nutrition division assisted with a paper version for some of our most vulnerable residents.

Garrett Regional Medical Center, Garrett College, Mountain Laurel, Garrett County Health Department, County Government, Community Action, and Garrett County Public School System specifically requested staff and clients, when appropriate, to take the survey using the digital link. The Garrett County Population Health, Innovation & Informatics unit provided two incentives for participation, one for completion of the survey and one to participate in one of ten focus groups held around the county. In seventeen weeks, our collaborative effort yielded 2,102 surveys. Ten focus groups were conducted with 60 individuals in Garrett County who volunteered their time to help us understand more about the priorities selected for their zip codes.

Templates

The survey instrument and focus group script are available within the included supplement.

EXTENDED TOOLS

Community Health Assessment Research Portal (CHArp)

While the presence of narrative and thorough analysis of data is vital to guiding the community health improvement process, it is equally important to ensure that datasets and resources are accessible and interactive for end-users to draw their own conclusions. Thus, this cycle marks the first time that community stakeholders can explore a dynamic portal designed specifically for the assessment process to generate need reports, assess prioritization, and ensure that health equity is a concept central to all activities in and around population health in Garrett County, Maryland.

To this end, Garrett County has developed an open source research tool available at:

garrettcountyhealthdepartment.github.io/CHArp

In addition to the easily accessible and interactive digital tools, charts, and maps available within the tool, each interactive element is mapped to a Tableau public sheet that includes relevant metadata for further analysis.

We greatly welcome your feedback on this new application via the built-in support mechanism for this tool.

INSTRUMENT

Garrett County & Surrounding Areas Community Needs Assessment (2019-2021)

Welcome!

The following survey is being conducted by the Garrett County Health Department with the Garrett County Local Management Board, Garrett County Behavioral Health Authority, Mountain Laurel Medical Center, and Garrett Regional Medical Center.

This survey should take approximately 2-5 minutes to complete, and all responses are anonymous. The results of this survey will help determine the prioritization of the next Garrett County Community Health Improvement Plan.

Please do not enter any personally identifiable information in any open text fields. Once you complete the survey, you will have the opportunity to enter your name in the prize drawing.

Thank you for taking time to help make our local communities healthier places to live, work, and play!

*** 1. What is your zip code?**

*** 2. What issues matter most to you? Select or enter up to 5 (five).**

Focus Group

SCRIPT

Focus Group Script

2019 Community Health Assessment

- Introductions:
 - My name is NAME and my role today is to help guide this discussion and learn more about what you think and how you feel. I will be working through a script and asking a lot of questions.
 - This focus group is a guided conversation about the top five issues people identified as their main concern in our latest community prioritization survey. We had 2,102 responses from the regional area and of those responses- NUMBER were from the ZIP code and the following topics were identified as the top five issues in this zip code that we want to talk more deeply about today:
 - The First topic is: Jobs, wages, economic development
 - Second topic is: Substance Abuse (opioids, prescription drugs, tobacco and alcohol)
 - Third topic is: Health Insurance
 - Fourth topic is: Mental Health
 - Fifth topic is: Education
 - In 2016 we published our first Garrett County Health Assessment. I like to think about like a slice in time. It's a picture of a dynamic process that helps us collect data to better define our community's needs. The intention is to use this data to better serve our residents. We use data about our area from federal, state and now local sources. SHOW Survey – This survey helps to narrow down the priorities and now we get to talk about why we think these are issues people are concerned about. It's also a time to explore solutions that can become strategies in the health improvement plan to address our issues.
 - We publish the assessment that gives us all the data we can find and then we publish the improvement plan. It's a measurable report that is accessible to everyone On-line and can be adjusted and updated as we together to make improvements.
 - I invite to visit mygarrettcountry.com to become involved with the topics that you are most passionate about. We'll have an opportunity after the group concludes to show you how it works.
 - There are a few guidelines for our discussion today:
 - We want to be respectful of one another, so we need to allow people to have an opportunity to finish their thoughts and not be interrupted and allow everyone an opportunity to be heard. You may not agree with the opinions or perceptions of others in this group and that is okay- we want it to be a welcoming place for people to share their own experiences without judgement for the purpose of having many different perspectives deepen the discussion.

Garrett County, a healthier place to live, work, and play!

- I will be recording our time for the ease of analysis, but I will use pseudo names in the reporting. I will use quotes as it relates to certain topics because themes emerge as we progress through our focus group cycle. We have nine scheduled in several areas of the county.
 - I need your consent to record our discussion and use the data. I will turn the recorder on and we will begin by going around the table and saying yes.
 - So our purpose today on DATE : To explore job, wages & economic development, substance abuse, health insurance and education with community members in the ZIP zip code in the context of building, improving and sustaining a healthy community.
- We'll start by talking about what you like the most about living in your community.
- What are some things that could improve how you feel about living here?
- Let's describe what a healthy community looks and feels like?
- On a scale of 1-5—one being very unhealthy and 5 being very healthy how does your community rate?
 - Why?
 - Why not?
- Thinking about what you just told me I would like to reflect on the role Jobs, Wages and Economic development play in the health of a community.
- Let's talk about these as it relates to ZIP:
 - What services, programs, or strategies could we have to do a better job of addressing jobs, wages and economic development?

Garrett County, a healthier place to live, work, and play!

Garrett County, MD

Demographics

Current population demographics and changes in demographic composition over time play a determining role in the types of health and social services needed by communities.

Total Population

A total of 29,516 people live in the 649.14 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. The population density for this area, estimated at 45.47 persons per square mile, is less than the national average population density of 90.88 persons per square mile.

Population Under Age 18

An estimated 19.34% of the population in the report area is under the age of 18 according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. An estimated total of 5,709 youths resided in the area during this time period. The number of persons under age 18 is relevant because this population has unique health needs which should be considered separately from other age groups.

Population in Limited English Households

This indicator reports the percentage of the population aged 5 and older living in Limited English speaking households. A “Limited English speaking household” is one in which no member 14 years old and over (1) speaks only English at home or (2) speaks a language other than English at home and speaks English “Very well.” This indicator is significant as it identifies households and populations that may need English-language assistance.

Renter-Occupied Housing

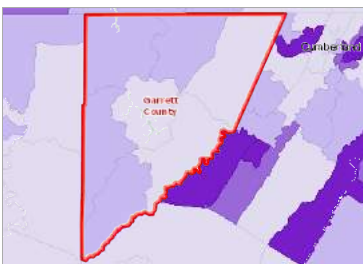

Tenure provides a measurement of home ownership, which has served as an indicator of the nation’s economy for decades. This data covers all occupied housing units, which are classified as either owner occupied or renter occupied. These data are used to aid in the distribution of funds for programs such as those involving mortgage insurance, rental housing, and national defense housing. Data on tenure allows planners to evaluate the overall viability of housing markets and to assess the stability of neighborhoods. The data also serve in understanding the characteristics of owner occupied and renter occupied units to aid builders, mortgage lenders, planning officials, government agencies, etc., in the planning of housing programs and services.³

Renter-Occupied Housing

All occupied housing units that are not owner occupied, whether they are rented or occupied without payment of rent, are classified as renter occupied.

Household Composition

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.

Report Area	Total Households	Family Households	Family Households, Percent	Non-Family Households	Non-Family Households, Percent

Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

Children Eligible for Free/Reduced Price Lunch

Within the report area 1,906 public school students or 49.73% are eligible for Free/Reduced Price lunch out of 3,833 total students enrolled. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Students	Number Free/Reduced Price Lunch Eligible	Percent Free/Reduced Price Lunch Eligible
Garrett County, MD	3,833	1,906	49.73%

Education - Student Reading Proficiency (4th Grade)

This indicator reports the percentage of children in grade 4 whose reading skills tested below the "proficient" level for the English Language Arts portion of the state-specific standardized test. This indicator is relevant because an inability to read English well is linked to poverty, unemployment, and barriers to healthcare access, provider communications, and health literacy/education.

Report Area	Total Students with Valid Test Scores	Percentage of Students Scoring 'Proficient' or Better	Percentage of Students Scoring 'Not Proficient' or Worse

Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one household has any income. A value of zero indicates perfect equality, where all households have equal income.

Index values are acquired from the 2013-17 American Community Survey and are not available for custom report areas or multi-county areas.

Report Area	Total Households	Gini Index Value
Garrett County, MD	11,865	0.44
Maryland	2,181,093	0.45
United States	118,825,921	0.48

Note: This indicator is compared to the state average.

Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

Report Area	Total Households	Average Household Income	Median Household Income
Garrett County, MD	11,865	\$63,130.00	\$48,174.00
Maryland	2,181,093	\$103,845.00	\$78,916.00
United States	118,825,921	\$81,283.00	\$57,652.00

Note: This indicator is compared to the state average.

Insurance - Uninsured Population

The lack of health insurance is considered a *key driver* of health status.

In the report area 7.52% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 7.34%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population (For Whom Insurance Status is Determined)	Total Uninsured Population	Percent Uninsured Population
Garrett County, MD	29,037	2,185	7.52%

Population Receiving SNAP Benefits (SAIPE)

This indicator reports the average percentage of the population receiving the Supplemental Nutrition Assistance Program (SNAP) benefits between the months of July 2014 and July 2015. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Population	Population Receiving SNAP Benefits	Percent Population Receiving SNAP Benefits
Garrett County, MD	29,460	4,335	14.7%

Teen Births

This indicator reports the rate of total births to women age of 15 - 19 per 1,000 female population age 15 - 19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

Report Area	Female Population Age 15 - 19	Births to Mothers Age 15 - 19	Teen Birth Rate (Per 1,000 Population)
Garrett County, MD	1,044	33	31.7

Physical Environment

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

Air Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

Report Area	Total Population	Average Daily Ambient Particulate Matter 2.5	Number of Days Exceeding Emissions Standards	Percentage of Days Exceeding Standards, Crude Average	Percentage of Days Exceeding Standards, Pop. Adjusted Average
Garrett County, MD	30,097	8.72	0	0	0%

Air Quality - Respiratory Hazard Index

This indicator reports the non-cancer respiratory hazard index score. This score represents the potential for noncancer adverse health effects, where scores less than 1.0 indicate adverse health effects are unlikely, and scores of 1.0 or more indicate a potential for adverse health effects.

Report Area	Total Population	Respiratory Hazard Index Score
Garrett County, MD	30,097	0.53
Maryland	5,773,465	2.01
United States	312,576,287	1.83

Data Source: EPA National Air Toxics Assessment.

Built Environment - Broadband Access

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. This data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included. This indicator is important because access to technology opens up opportunities for employment and education.

Report Area	Total Population (2010)	Access to DL Speeds > 25MBPS (2017)

Climate & Health - High Heat Index Days

This indicator reports the percentage of recorded weather observations with heat index values over 103 degrees Fahrenheit. The "heat index" is a single value that takes both temperature and humidity into account. The higher the heat index, the hotter the weather feels, since sweat does not readily evaporate and cool the skin. The heat index is a better measure than air temperature alone for estimating the risk to workers from environmental heat sources.

Report Area	Total Weather Observations	Average Heat Index Value	Observations with High Heat Index Values	Observations with High Heat Index Values, Percentage
Garrett County, MD	4,745	86.77	0	0%
Maryland	64,605	90.9	1,194	1.8%

Food Environment - Fast Food Restaurants

This indicator reports the number of fast food restaurants per 100,000 population. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

Report Area	Total Population	Number of Establishments	Establishments, Rate per 100,000 Population

Food Environment - Grocery Stores

This indicator reports the number of grocery stores per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Included are delicatessen-type establishments. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores are excluded. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

Housing - Housing Cost Burden (30%)

This indicator reports the percentage of the households where housing costs exceed 30% of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

Report Area	Total Households	Cost Burdened Households (Housing Costs Exceed 30% of Income)	Percentage of Cost Burdened Households (Over 30% of Income)
Garrett County, MD	11,865	3,018	25.44%

Cost Burdened Households by Tenure, Total

This data shows the number of households that spend more than 30% of the household income on housing costs. In the report area, there were 3,018 cost burdened households according to the U.S. Census Bureau American Community Survey (ACS) 2013-2017 5-year estimates. The data for this indicator is only reported for households where household housing costs

and income earned was identified in the American Community Survey.

Report Area	Cost Burdened Households	Cost Burdened Rental Households	Cost Burdened Owner Occupied Households (With Mortgage)	Cost Burdened Owner Occupied Households (With No Mortgage)
Garrett County, MD	3,018	886	1,700	432

Housing - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard.

Report Area	Total Occupied Housing Units	Occupied Housing Units with One or More Substandard Conditions	Percent Occupied Housing Units with One or More Substandard Conditions

Substandard Housing Units, Percent of Total by Tract, ACS 2013-17

Substandard Housing: Number of Substandard Conditions Present

Report Area	No Conditions	One Condition	Two or Three Conditions	Four Conditions
Garrett County, MD	74.65%	24.81%	0.54%	0%
Maryland	67.29%	31.42%	1.29%	0%
United States	67.01%	31.04%	1.95%	0.01%

Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

Report Area	Total Occupied Housing Units	Housing Units Lacking Complete Plumbing Facilities	Housing Units Lacking Complete Plumbing Facilities, Percent
Garrett County, MD	11,865	66	0.56%
Maryland	2,181,093	6,769	0.31%
United States	118,825,921	470,774	0.4%

Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

Report Area	Total Occupied Housing Units	Housing Units Lacking Complete Kitchen Facilities	Housing Units Lacking Complete Kitchen Facilities, Percent
Garrett County, MD	19,211	592	3.08%
Maryland	2,427,014	46,909	1.93%
United States	135,393,564	3,859,746	2.85%

Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

Clinical Care

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

30-Day Hospital Readmissions

This indicator reports the percentage of Medicare fee-for-service beneficiaries readmitted to a hospital within 30 days of an initial hospitalization discharge.

Report Area	Medicare Part A and B Beneficiaries	Rate of 30-Day Hospital Readmissions among Medicare Beneficiaries
Garrett County, MD	429	No data

Access to Mental Health Care Providers, Rate Per 100,000 Pop. by County, CHR 2017

Access to Primary Care

This indicator reports the number of primary care physicians per 100,000 population. Doctors classified as "primary care physicians" by the AMA include: General Family Medicine MDs and DOs, General Practice MDs and DOs, General Internal Medicine MDs and General Pediatrics MDs. Physicians age 75 and over and physicians practicing sub-specialties within the listed specialties are excluded. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. In the report area, 534 Medicare enrollees with diabetes have had an annual exam out of 628 Medicare enrollees in the report area with diabetes, or 85%. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Medicare Enrollees	Medicare Enrollees with Diabetes	Medicare Enrollees with Diabetes with Annual Exam	Percent Medicare Enrollees with Diabetes with Annual Exam

Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Report Area	Total Population	Number of Federally Qualified Health Centers	Rate of Federally Qualified Health Centers per 100,000 Population

Lack of Prenatal Care

This indicator reports the percentage of women who do not obtain prenatal care during their first trimester of pregnancy. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Births	Mothers Starting Prenatal Care in First Semester	Mothers with Late or No Prenatal Care	Prenatal Care Not Reported	Percentage Mothers with Late or No Prenatal Care

Preventable Hospital Events

This indicator reports the discharge rate (per 1,000 Medicare enrollees) for conditions that are ambulatory care sensitive (ACS). ACS conditions include pneumonia, dehydration, asthma, diabetes, and other conditions which could have been

prevented if adequate primary care resources were available and accessed by those patients. This indicator is relevant because analysis of ACS discharges allows demonstrating a possible “return on investment” from interventions that reduce admissions (for example, for uninsured or Medicaid patients) through better access to primary care resources.

Report Area	Total Medicare Part A Enrollees	Ambulatory Care Sensitive Condition Hospital Discharges	Ambulatory Care Sensitive Condition Discharge Rate

Prevention - Mammogram

This indicator reports the percentage of female Medicare enrollees, age 67-69, who have received one or more mammograms in the past two years. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge,

insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Medicare Enrollees	Female Medicare Enrollees Age 67-69	Female Medicare Enrollees with Mammogram in Past 2 Years	Percent Female Medicare Enrollees with Mammogram in Past 2 Year

Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

Alcohol Consumption

This indicator reports the percentage of adults aged 18 and older who self-report heavy alcohol consumption (defined as more than two drinks per day on average for men and one drink per day on average for women). This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as cirrhosis, cancers, and untreated mental and behavioral health needs.

Report Area	Total Population Age 18+	Estimated Adults Drinking Excessively	Estimated Adults Drinking Excessively (Crude Percentage)	Estimated Adults Drinking Excessively (Age-Adjusted Percentage)

STI - HIV Prevalence

This indicator reports prevalence rate of HIV per 100,000 population. This indicator is relevant because HIV is a life-threatening communicable disease that disproportionately affects minority populations and may also indicate the prevalence of unsafe sex practices.

Report Area	Population Age 13+	Population with HIV / AIDS	Population with HIV / AIDS, Rate (Per 100,000 Pop.)
Garrett County, MD	25,593	14	54.7
Maryland	5,027,886	33,072	657.8
United States	268,159,414	971,524	362.3

Population with HIV / AIDS, Rate (Per 100,000 Pop.)

Note: This indicator is compared to the state average.

Tobacco Expenditures

This indicator reports estimated expenditures for cigarettes, as a percentage of total household expenditures. This indicator is relevant because tobacco use is linked to leading causes of death such as cancer and cardiovascular disease. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas.

Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

Asthma Prevalence

This indicator reports the percentage of adults aged 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This indicator is relevant because asthma is a prevalent problem in the U.S. that is often exacerbated by poor environmental conditions.

Report Area	Survey Population (Adults Age 18+)	Total Adults with Asthma	Percent Adults with Asthma
Garrett County, MD	26,077	3,670	14.1%
Maryland	4,418,284	603,074	13.6%

Cancer Incidence - All Sites

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

Report Area	Estimated Total Population	New Cases (Annual Average)	Cancer Incidence Rate (Per 100,000 Pop.)
Garrett County, MD	1,987	82	412.6

Mortality - Premature Death

This indicator reports Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death, age-adjusted to the 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

Report Area	Total Population	Total Premature Death, 2015-2017	Total Years of Potential Life Lost, 2015-2017 Average	Years of Potential Life Lost, Rate per 100,000 Population

Mortality - Suicide

This indicator reports the rate of death due to intentional self-harm (suicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.

Report Area	Total Population	Average Annual Deaths, 2012-2016	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)
Garrett County, MD	29,537	4	14.9	15

Obesity (Youth)

This indicator reports the percentage of youth aged 10 - 17 who are obese, based on Body Mass Index (BMI). Children are classified as obese if their calculated BMI is in the 95th percentile or above for their age. This indicator is relevant because excess weight is a prevalent problem in the U.S.; it indicates an unhealthy lifestyle and puts individuals at risk for further health issues.

Report Area	Total Population (Age 10 - 17)	Number Obese	Percent Obese
Maryland	571,754	96,856	17%

Poor Dental Health

This indicator reports the percentage of adults age 18 and older who self-report that six or more of their permanent teeth have been removed due to tooth decay, gum disease, or infection. This indicator is relevant because it indicates lack of access to dental care and/or social barriers to utilization of dental services.

Report Area	Total Population (Age 18+)	Total Adults with Poor Dental Health	Percent Adults with Poor Dental Health
Garrett County, MD	23,273	5,069	21.8%

Demographics

Current population demographics and changes in demographic composition over time play a determining role in the types of health and social services needed by communities.

Total Population

A total of 493,340 people live in the 4,439.16 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. The population density for this area, estimated at 111.13 persons per square mile, is greater than the national average population density of 90.88 persons per square mile.

Change in Total Population

According to the United States Census Bureau Decennial Census, between 2000 and 2010 the population in the report area grew by 46,339 persons, a change of 10.49%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

Population Under Age 18

An estimated 19.82% of the population in the report area is under the age of 18 according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. An estimated total of 97,759 youths resided in the area during this time period. The number of persons under age 18 is relevant because this population has unique health needs which should be considered

separately from other age groups.

Population Age 18-64

This indicator reports the percentage of population age 18-64 in the designated geographic area. This indicator is relevant because it is important to understand the percentage of adults in the community, as this population has unique health needs which should be considered separately from other age groups.

Report Area	Total Population	Population Age 18-64	Percent Population Age 18-64

Population Age 65+

An estimated 17.12% of the population in the report area is age 65 or older according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. An estimated total of 84,477 older adults resided in the area during this time period. The number of persons age 65 or older is relevant because this population has unique health needs which should be

considered separately from other age groups.

Population with Any Disability

This indicator reports the percentage of the total civilian non-institutionalized population with a disability. This indicator is relevant because disabled individuals comprise a vulnerable population that requires targeted services and outreach by providers.

Population in Limited English Households

This indicator reports the percentage of the population aged 5 and older living in Limited English speaking households. A “Limited English speaking household” is one in which no member 14 years old and over (1) speaks only English at home or (2) speaks a language other than English at home and speaks English “Very well.” This indicator is significant as it identifies households and populations that may need English-language assistance.

Renter-Occupied Housing

Tenure provides a measurement of home ownership, which has served as an indicator of the nation’s economy for decades. This data covers all occupied housing units, which are classified as either owner occupied or renter occupied. These data are

used to aid in the distribution of funds for programs such as those involving mortgage insurance, rental housing, and national defense housing. Data on tenure allows planners to evaluate the overall viability of housing markets and to assess the stability of neighborhoods. The data also serve in understanding the characteristics of owner occupied and renter occupied units to aid builders, mortgage lenders, planning officials, government agencies, etc., in the planning of housing programs and services.³

Renter-Occupied Housing

All occupied housing units that are not owner occupied, whether they are rented or occupied without payment of rent, are classified as renter occupied.

Household Composition

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

**Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.*

Urban and Rural Population

This indicator reports the percentage of population living in urban and rural areas. Urban areas are identified using population density, count, and size thresholds. Urban areas also include territory with a high degree of impervious surface (development). Rural areas are all areas that are not urban.

Report Area	Total Population	Urban Population	Rural Population	Percent Urban	Percent Rural

Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community’s ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

Children Eligible for Free/Reduced Price Lunch

Within the report area 33,146 public school students or 47.17% are eligible for Free/Reduced Price lunch out of 70,276 total students enrolled. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Students	Number Free/Reduced Price Lunch Eligible	Percent Free/Reduced Price Lunch Eligible

Education - Student Reading Proficiency (4th Grade)

This indicator reports the percentage of children in grade 4 whose reading skills tested below the "proficient" level for the English Language Arts portion of the state-specific standardized test. This indicator is relevant because an inability to read English well is linked to poverty, unemployment, and barriers to healthcare access, provider communications, and health literacy/education.

Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income.

Index values are acquired from the 2013-17 American Community Survey and are not available for custom report areas or multi-county areas.

Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

Insurance - Uninsured Population

The lack of health insurance is considered a *key driver* of health status.

In the report area 7.84% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 7.34%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Population Receiving SNAP Benefits (SAIPE)

This indicator reports the average percentage of the population receiving the Supplemental Nutrition Assistance Program (SNAP) benefits between the months of July 2014 and July 2015. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Poverty - Population Below 100% FPL

Poverty is considered a *key driver* of health status.

Within the report area 15.81% or 74,385 individuals are living in households with income below the Federal Poverty Level

(FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Teen Births

This indicator reports the rate of total births to women age of 15 - 19 per 1,000 female population age 15 - 19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

Unemployment Rate

Total unemployment in the report area for the current month equals 10,799, or 4.5% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Labor Force	Number Employed	Number Unemployed	Unemployment Rate

Violent Crime

This indicator reports the rate of violent crime offenses reported by law enforcement per 100,000 residents. Violent crime includes homicide, rape, robbery, and aggravated assault. This indicator is relevant because it assesses community safety.

Report Area	Violent Crimes	Violent Crime Rate (Per 100,000 Pop.)
Allegany County, MD	225	310.5
Garrett County, MD	66	223.5
Washington County, MD	466.5	311.6

Physical Environment

A community’s health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

Air Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

Report Area	Total Population	Average Daily Ambient Particulate Matter 2.5	Number of Days Exceeding Emissions Standards	Percentage of Days Exceeding Standards, Crude Average	Percentage of Days Exceeding Standards, Pop. Adjusted Average

Air Quality - Respiratory Hazard Index

This indicator reports the non-cancer respiratory hazard index score. This score represents the potential for noncancer adverse health effects, where scores less than 1.0 indicate adverse health effects are unlikely, and scores of 1.0 or more indicate a potential for adverse health effects.

Report Area	Total Population	Respiratory Hazard Index Score

Built Environment - Broadband Access

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. This data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included. This indicator is important because access to technology opens up opportunities for employment and education.

Built Environment - Recreation and Fitness Facility Access

This indicator reports the number per 100,000 population of recreation and fitness facilities as defined by North American Industry Classification System (NAICS) Code 713940. This indicator is relevant because access to recreation and fitness facilities encourages physical activity and other healthy behaviors.

Climate & Health - High Heat Index Days

This indicator reports the percentage of recorded weather observations with heat index values over 103 degrees Fahrenheit. The "heat index" is a single value that takes both temperature and humidity into account. The higher the heat index, the hotter the weather feels, since sweat does not readily evaporate and cool the skin. The heat index is a better measure than air temperature alone for estimating the risk to workers from environmental heat sources.

Report Area	Total Weather Observations	Average Heat Index Value	Observations with High Heat Index Values	Observations with High Heat Index Values, Percentage

Food Environment - Fast Food Restaurants

This indicator reports the number of fast food restaurants per 100,000 population. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

Custom Area Estimate

Food Environment - Grocery Stores

This indicator reports the number of grocery stores per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Included are delicatessen-type establishments. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores are excluded. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

Food Environment - Low Food Access

This indicator reports the percentage of the population with low food access. Low food access is defined as living more than ½ mile from the nearest supermarket, supercenter, or large grocery store. Data are from the 2017 report, [Low-Income and Low-Supermarket-Access Census Tracts, 2010-2015](#). This indicator is relevant because it highlights populations and geographies facing food insecurity.

Report Area	Total Population	Population with Low Food Access	Percent Population with Low Food Access

Population with Limited Food Access, Percent by Tract, FARA 2015

Food Environment - Modified Retail Food Environment Index

This indicator reports the percentage of population living in census tracts with no or low access to healthy retail food stores. Figures are based on the CDC Modified Retail Food Environment Index. For this indicator, low food access tracts are considered those with index scores of 10.0 or less.

Report Area	Total Population	Percent Population in Tracts with No Food Outlet	Percent Population in Tracts with No Healthy Food Outlet	Percent Population in Tracts with Low Healthy Food Access	Percent Population in Tracts with Moderate Healthy Food Access	Percent Population in Tracts with High Healthy Food Access

Housing - Housing Cost Burden (30%)

This indicator reports the percentage of the households where housing costs exceed 30% of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

Housing - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard.

Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

Housing - Vacancy Rate

This indicator reports the number and percentage of housing units that are vacant. A housing unit is considered vacant by the American Community Survey if no one is living in it at the time of interview. Units occupied at the time of interview entirely by persons who are staying two months or less and who have a more permanent residence elsewhere are considered to be temporarily occupied, and are classified as “vacant.”

Clinical Care

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

30-Day Hospital Readmissions

This indicator reports the percentage of Medicare fee-for-service beneficiaries readmitted to a hospital within 30 days of an initial hospitalization discharge.

Access to Dentists

This indicator reports the number of dentists per 100,000 population. This indicator includes all dentists - qualified as having a doctorate in dental surgery (D.D.S.) or dental medicine (D.M.D.), who are licensed by the state to practice dentistry and who are practicing within the scope of that license.

Report Area	Total Population, 2015	Dentists, 2015	Dentists, Rate per 100,000 Pop.

Access to Mental Health Care Providers, Rate Per 100,000 Pop. by County, CHR 2017

Access to Primary Care

This indicator reports the number of primary care physicians per 100,000 population. Doctors classified as "primary care physicians" by the AMA include: General Family Medicine MDs and DOs, General Practice MDs and DOs, General Internal Medicine MDs and General Pediatrics MDs. Physicians age 75 and over and physicians practicing sub-specialties within the listed specialties are excluded. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. In the report area, 7,150 Medicare enrollees with diabetes have had an annual exam out of 8,255 Medicare enrollees in the report area with diabetes, or 86.62%. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Report Area	Total Population	Number of Federally Qualified Health Centers	Rate of Federally Qualified Health Centers per 100,000 Population

Health Professional Shortage Areas

This indicator reports the number and location of health care facilities designated as "Health Professional Shortage Areas" (HPSAs), defined as having shortages of primary medical care, dental or mental health providers. This indicator is relevant

because a shortage of health professionals contributes to access and health status issues.

Report Area	Primary Care Facilities	Mental Health Care Facilities	Dental Health Care Facilities	Total HPSA Facility Designations

Lack of Prenatal Care

This indicator reports the percentage of women who do not obtain prenatal care during their first trimester of pregnancy. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Preventable Hospital Events

This indicator reports the discharge rate (per 1,000 Medicare enrollees) for conditions that are ambulatory care sensitive (ACS). ACS conditions include pneumonia, dehydration, asthma, diabetes, and other conditions which could have been prevented if adequate primary care resources were available and accessed by those patients. This indicator is relevant because analysis of ACS discharges allows demonstrating a possible “return on investment” from interventions that reduce admissions (for example, for uninsured or Medicaid patients) through better access to primary care resources.

Prevention - Mammogram

This indicator reports the percentage of female Medicare enrollees, age 67-69, who have received one or more mammograms in the past two years. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Medicare Enrollees	Female Medicare Enrollees Age 67-69	Female Medicare Enrollees with Mammogram in Past 2 Years	Percent Female Medicare Enrollees with Mammogram in Past 2 Year

Prevention - Recent Primary Care Visit

This indicator reports the number and percentage of adults age 18 and older with one or more visits to a doctor for routine checkup within the past one year. Data for this indicator is only available for the population within the top 500 most populous cities across the United States. County, State, and National values represent the population within those cities, and not the total US population.

Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

Alcohol Consumption

This indicator reports the percentage of adults aged 18 and older who self-report heavy alcohol consumption (defined as more than two drinks per day on average for men and one drink per day on average for women). This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as cirrhosis, cancers, and untreated mental and behavioral health needs.

Alcohol Expenditures

This indicator reports estimated annual expenditures for alcoholic beverages purchased at home, as a percentage of total household expenditures. This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as cirrhosis, cancers, and untreated mental and behavioral health needs. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas.

Fruit/Vegetable Expenditures

This indicator reports estimated expenditures for fruits and vegetables purchased for in-home consumption, as a percentage of total food-at-home expenditures. This indicator is relevant because current behaviors are determinants of future health, and because unhealthy eating habits may illustrate a cause of significant health issues, such as obesity and diabetes. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas.

Physical Inactivity

Within the report area, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?". This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health.

Tobacco Expenditures

This indicator reports estimated expenditures for cigarettes, as a percentage of total household expenditures. This indicator is relevant because tobacco use is linked to leading causes of death such as cancer and cardiovascular disease. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas.

Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

Asthma Prevalence

This indicator reports the percentage of adults aged 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This indicator is relevant because asthma is a prevalent problem in the U.S. that is often exacerbated by poor environmental conditions.

Report Area	Survey Population (Adults Age 18+)	Total Adults with Asthma	Percent Adults with Asthma

Cancer Incidence - All Sites

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

Cancer Incidence - Breast

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of females with breast cancer adjusted to 2000 U.S. standard population age groups (Under Age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

Cancer Incidence - Prostate

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of males with prostate cancer adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

Infant Mortality

This indicator reports the rate of deaths to infants less than one year of age per 1,000 births. This indicator is relevant because high rates of infant mortality indicate the existence of broader issues pertaining to access to care and maternal and child health.

Mortality - Cancer

This indicator reports the rate of death due to malignant neoplasm (cancer) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because cancer is a leading cause of death in the United States.

Report Area	Total Population	Average Annual Deaths, 2012-2016	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)

Mortality - Homicide

This indicator reports the rate of death due to assault (homicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because homicide rate is a measure of poor community safety and is a leading cause of premature death.

Mortality - Lung Disease

This indicator reports the rate of death due to chronic lower respiratory disease per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because lung disease is a leading cause of death in the United States.

Mortality - Motor Vehicle Crash

This indicator reports the rate of death due to motor vehicle crashes per 100,000 population, which include collisions with another motor vehicle, a nonmotorist, a fixed object, and a non-fixed object, an overturn, and any other non-collision. This indicator is relevant because motor vehicle crash deaths are preventable and they are a cause of premature death.

Pedestrian Motor Vehicle Crash Mortality, Rate (Per 100,000 Pop.) by County, NHTSA 2011-2015

Mortality - Premature Death

This indicator reports Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death, age-adjusted to the 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

Mortality - Suicide

This indicator reports the rate of death due to intentional self-harm (suicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.

Suicide, Age-Adjusted Death Rate (Per 100,000 Pop.)

Obesity (Youth)

This indicator reports the percentage of youth aged 10 - 17 who are obese, based on Body Mass Index (BMI). Children are classified as obese if their calculated BMI is in the 95th percentile or above for their age. This indicator is relevant because excess weight is a prevalent problem in the U.S.; it indicates an unhealthy lifestyle and puts individuals at risk for further health issues.

Report Area	Total Population (Age 10 - 17)	Number Obese	Percent Obese
Maryland	571,754	96,856	17%
United States	30,059,005	4,851,000	16%

Percentage of Children Age 10-17 Obese

Note: This indicator is compared to the state average.

Poor Dental Health

This indicator reports the percentage of adults age 18 and older who self-report that six or more of their permanent teeth have been removed due to tooth decay, gum disease, or infection. This indicator is relevant because it indicates lack of access to dental care and/or social barriers to utilization of dental services.

		Children & Adolescents Who Are Obese ✓

Percentage of students who were obese (> 95th percentile for body mass index, by age and sex)

Adult obesity in Garrett County, MD County, State and National Trends

Garrett County is getting worse for this measure.

Notes:

Each year represents a 3-year average around the middle year (e.g. 2015 is the middle year of 2014-2016). Starting with the 2011 data, a new BRFSS methodology was introduced that included cell phone users. Data from prior years should only be compared with caution.

Percentage of students who had five or more drinks of alcohol in a row, that is, within a couple of hours, on one or more of the past 30 days

MD – 2016- 13%
2019- 20.2%

Priorities for 2021

- **Prevent local outbreaks of SAR CoV-2 (COVID-19)**
- **Chronic Disease, focusing on risk factors-nutrition, physical Activity and tobacco**
- **Access to Care & Linkages to Community Resources**
- **Behavioral Health: Mental Health & Substance Use**
- **Family Structure with emphasis on maternal, child and adolescent health**
- **Social Determinants of health, specifically economic inequities and poverty**
